Internal document — do not share outside the company.

1. About this guide

Patent Hub is the team's dashboard for patent applications. It shows every application from the LR Sheet. It tells you what is due, what is late and what needs fixing.

This guide explains every tab, card, column, filter and button. Each chapter has the same parts:

- **What it is for**
- **Who uses it and when**
- **How to use it**, step by step
- **What everything means**
- **Screenshots**, for desktop and for phone where the phone layout is different
- **Common problems**

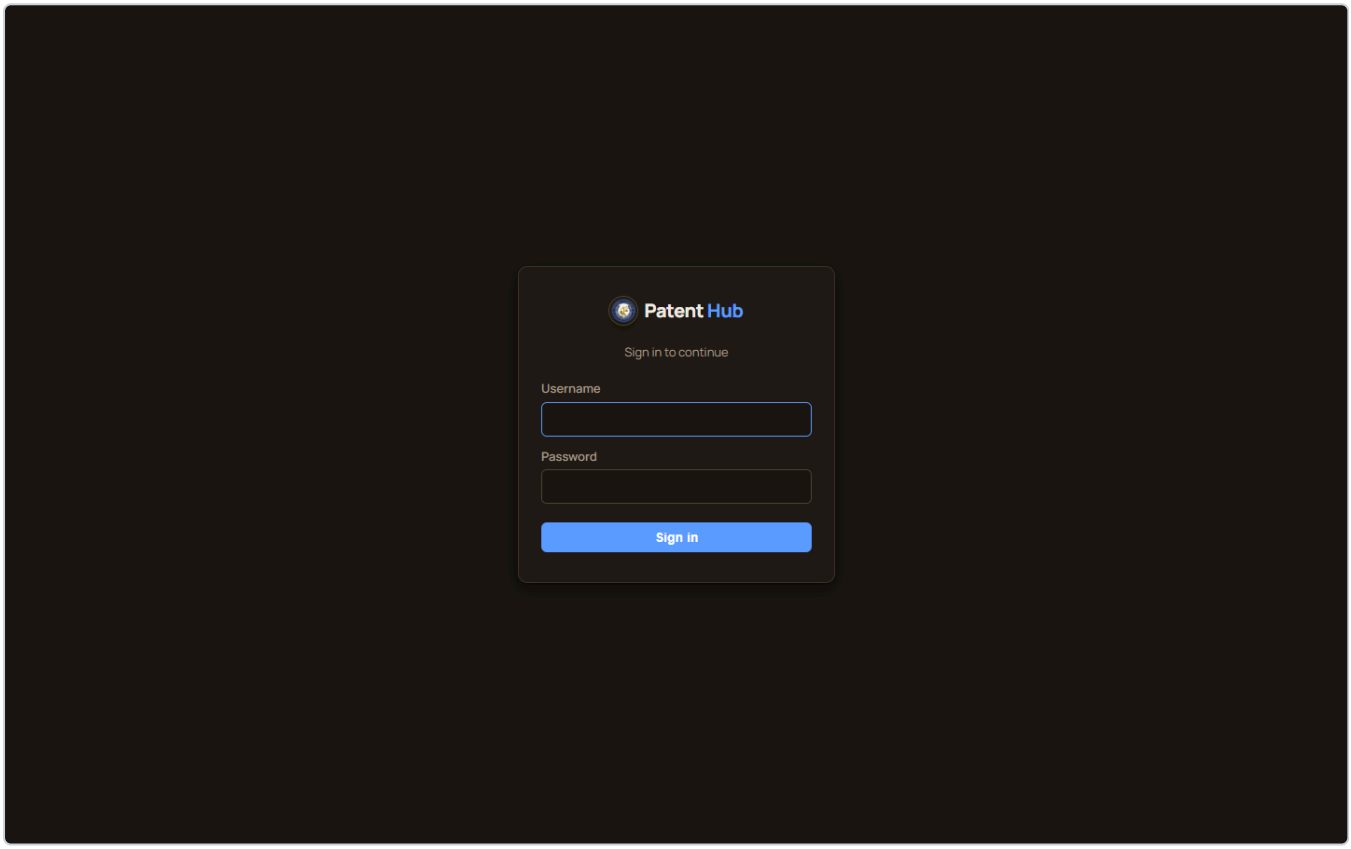

You do not need to read it from start to end. Jump to the tab you need. Words like PS, CS, FER and Form 18 are explained in the Glossary.

2. Getting started

2.1 Logging in

Patent Hub has one shared login for the whole team. Ask the app owner for the username and password.

1. Open the Patent Hub link in your browser.
2. Type the **Username** and **Password**.
3. Click **Sign in**.

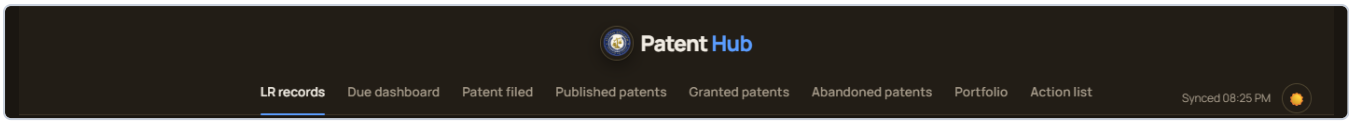

The login screen.

> **Good to know**
>
> - You stay logged in while the browser tab is open. If you close the tab, you must log in again.
> - When the app's server restarts (for example after an update), everyone is logged out. Just log in again.

2.2 The header

The header is at the top of every page.

The header on desktop: the Patent Hub logo, the tabs, the sync status and the theme button.

Part	What it means
Tabs	LR records, Due dashboard, Patent filed, Published patents, Granted patents, Abandoned patents, Portfolio (Client portfolio) and Action list. Click a tab to open it. On smaller screens some tab names are shorter, for example "Published" or "Portfolio".
Synced hh:mm	The last time the app read the LR Sheet. This is normal.
⚠ Data may be stale	The last sheet read failed, or it was more than about 10 minutes ago. Point at the warning to see the reason. See Common problems.
⚠ Backend unreachable	The browser cannot reach the app's server. Check your internet. If it keeps happening, tell the app owner.
🌞 / 🌙 button	Switches between dark mode and light mode. The app always opens in dark mode.

2.3 Things that work the same on every tab

Control	What it does
Search box	Type part of a code, title or application number. The list updates as you type. Click × to clear the search.
Summary cards (the boxes with big numbers)	Show counts. Most cards are also filters: click a card to show only those rows. The highlighted card is the one in use.
Number next to the filters	How many rows match all the filters you picked.
Refresh sheet	Makes the app read the LR Sheet **right now**, without waiting the usual 5 minutes. Use it after you change the sheet. A green "Sheet refreshed" message appears.
Export to Excel	Downloads the rows you see (after your filters) as an Excel file. It exports all matching rows, not only the current page. The button is grey when no rows match.
Blue Code	Click a code to open its detail page. Click **Back** to return to the list. Your filters are kept.
Application number	Click an application number to copy it. The text briefly changes to "Copied".
Tabs remember your filters	If you leave a tab and come back, your month, filters and search are still there.

2.4 Desktop and phone

- On a **computer**, lists show as tables.
- On a **phone** (any screen narrower than 720 pixels), lists show as **cards**. Tap a card to open its detail page. Tap the ‹ **Back** button at the top to return to the same place in the list.
- Phones show 25 cards per page. Use **Prev** and **Next** at the bottom.
- On a phone, all filters sit together at the top. **Refresh** and **Export** are the two buttons under them.
- **Editing is desktop only.** On a phone the Due dashboard is view-only.
- Tablets show the desktop layout.

3. How the data flows

Patent Hub does not hold its own copy of the applications. It reads them from the team's Google Sheet, the **LR Sheet** (its **DATA** tab).

The main rules:

1. **The LR Sheet is the source of truth.** Dates, codes, titles, inventors, STATUS and "Assigned to" all come from the sheet.
2. **Patent Hub never writes to the sheet.** To correct a date or a name, change it in the LR Sheet.
3. **Changes show up within 5 minutes.** Click **Refresh sheet** to see them at once.
4. **A red Code cell means "abandoned".** The app reads the fill colour of the Code cell. A red fill marks the application as abandoned on every tab.
5. **A few fields live only in Patent Hub.** On the Due dashboard you can type *Status notes*, *Issue*, *Checklist date* and *Action*. You can also set *Assigned to* for FER and Form 3, and the status of a past Hearing. These are saved in Patent Hub's own database, not in the sheet. They belong to one due on one deadline date.
6. **If a sheet read fails, the app keeps showing the last good data.** The header then shows "⚠ Data may be stale".

How a data issue disappears

The app checks the sheet every time it reads it. When something looks wrong, it lists it under **Action list → Data issues**, or under the **Data issues** card on the Due dashboard. Nobody types these issues in by hand.

To clear an issue:

1. Open the LR Sheet and fix the cell. For example, correct a date, remove a duplicate application number, or rewrite the Inventor Name as `1. Name`.
2. Go back to Patent Hub and click **Refresh sheet**, or wait up to 5 minutes.
3. The issue is gone from the list. If it is still there, the cell is still not in the format the app expects. See Data issues.

4. LR records

What it is for

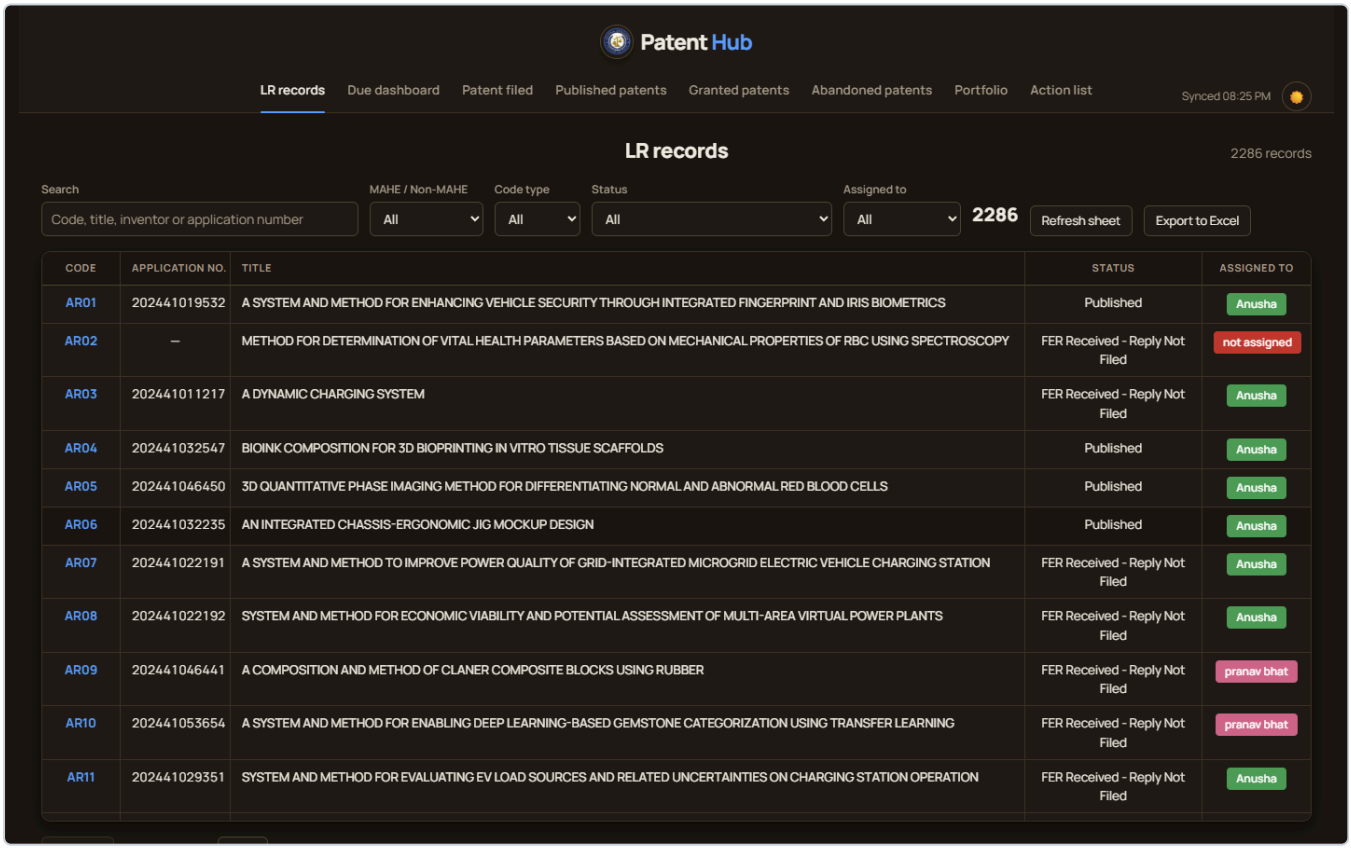

LR records is the whole LR Sheet in a searchable list. Use it to find any application quickly and see every column of its row.

Who uses it and when

Anyone on the team, whenever you need the full details of one application. For example, when a client calls with a code or an application number.

How to use it

1. Click the **LR records** tab. It is the first tab after you log in.
2. Type a code, title, inventor name or application number in **Search**.
3. If needed, narrow the list with the filters.
4. Click a **Code** to open the full record.
5. Click **Back** to return to the list.

LR records on desktop: search, filters, and the list of records, 25 per page.

What everything means

Filters

Filter	Meaning
Search	Matches the code, title, inventor name or application number.
MAHE / Non-MAHE	All, MAHE, Non-MAHE or Unclassified. The group comes from the Code's letters (see Glossary).
Code type	The letters at the start of the code, for example "AR" for AR477. The list only offers code types that fit the MAHE / Non-MAHE choice.
Status	The sheet's STATUS text, for example "PS Filed - CS Not Filed". The list is built from what is in the sheet.
Assigned to	The drafter in the sheet's "Assigned to" column.

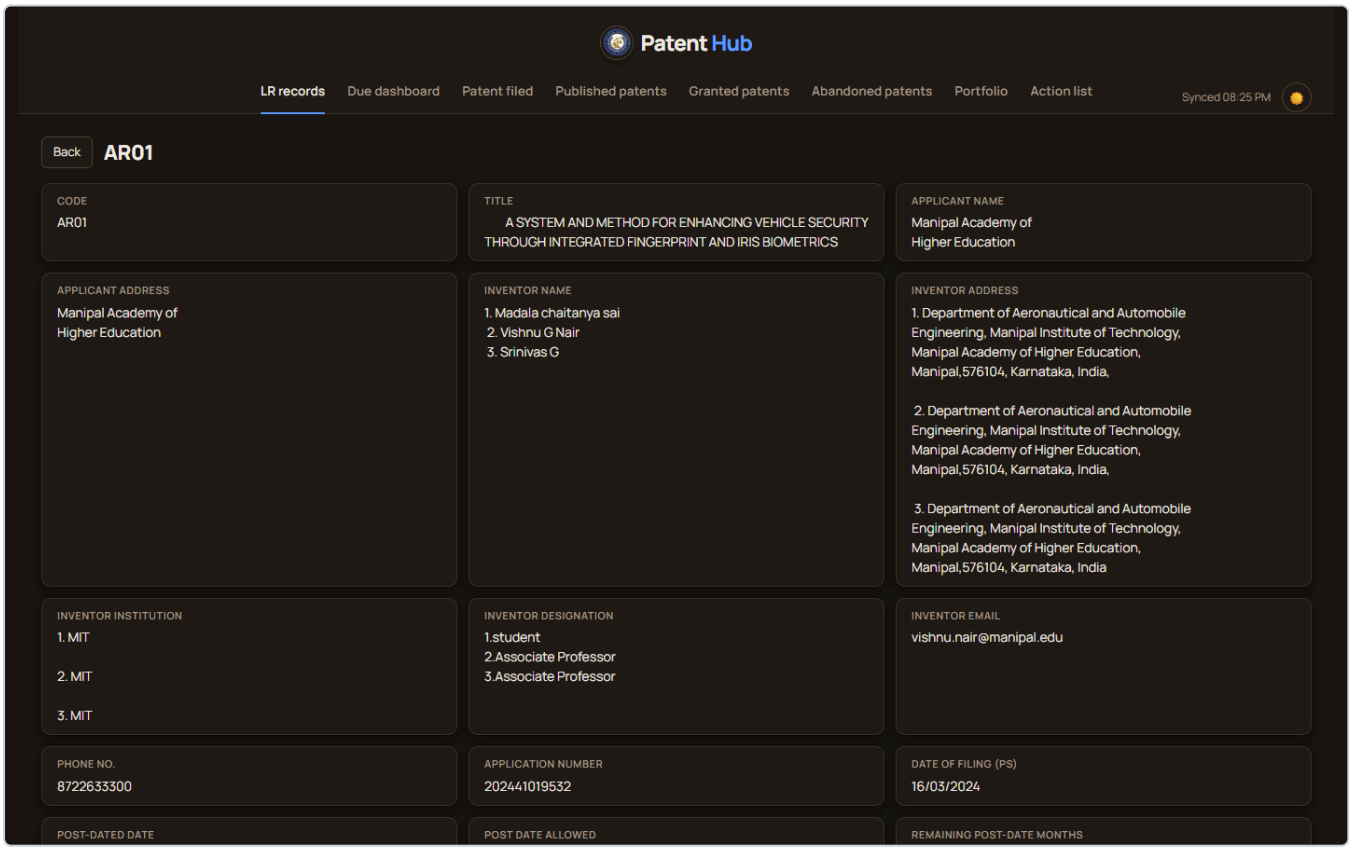

Columns: Code, Application no., Title, Status, Assigned to. The coloured name tag is the drafter, and each person always has the same colour.

Buttons: Refresh sheet and Export to Excel. The Excel file has 15 columns: Code, MAHE / Non-MAHE, Application no., Title, Applicant, Inventor Name, Institution, Assigned to, Status, Filing (PS), Filing (CS), Publication date, Publication no., Date of grant and Next renewal.

Paging: 25 records per page. Use **Previous** and **Next** at the bottom.

The record page

Clicking a code shows **every column** of that row in the sheet, exactly as the sheet has it.

A full LR record on desktop.

On a phone, the record is split into sections you can open and close: **Basic info**, **Applicant and contact**, **Dates**, **Forms** and **Other**. The number on each section is how many fields it holds.

Common problems

- **"No matching records".** Clear the search (×) and set every filter back to **All**.
- **A record is missing.** The row has no Code in the sheet. Rows without a Code are not shown. They appear under Data issues → Blank Code rows.
- **Details look wrong.** The page shows the sheet as it is. Fix the sheet, then click **Refresh sheet**.

5. Due dashboard

What it is for

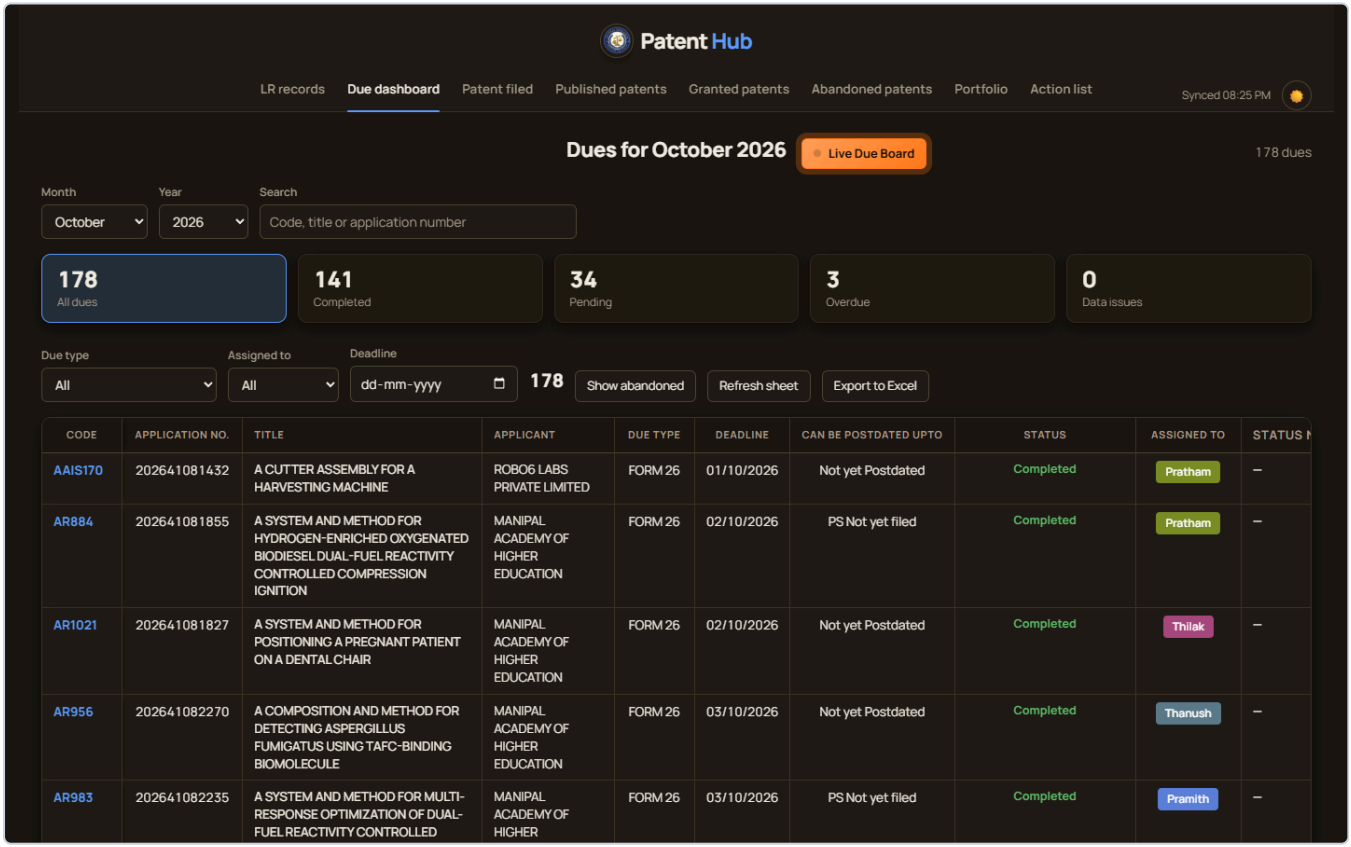

The Due dashboard lists every deadline that falls in one month. You can see which dues are done, pending or overdue, and add your own notes to each one.

Who uses it and when

Drafters and seniors, every day, to plan the month's work and record progress. Seniors also use it to assign FER and Form 3 work.

How to use it

1. Click the **Due dashboard** tab. It opens on the current month.
2. Pick another **Month** and **Year** if needed. "All months" shows the whole year. "All years" shows every due ever.
3. Click a summary card (for example **Overdue**) to see only those dues.
4. Narrow the list with **Due type**, **Assigned to** or one exact **Deadline** date.
5. Double-click a note cell to type in it (see Editing a due).
6. Click a **Code** to open the due's detail page.

The Due dashboard for the current month.

What everything means

Summary cards

Card	Meaning
All dues	Every due in the chosen month.
Completed	The filing date for that due is in the sheet.
Pending	Not filed yet, and the deadline has not passed.
Overdue	Not filed, and the deadline has passed.
Data issues	Deadlines the app could not read (see Due data issues).

Due types. The app makes a due for each of these:

Due type	Deadline comes from	Counts as done when
PS-CS	CS DEADLINE	Date of filing (CS) is filled
FORM 1	Form-1 deadline	Form-1 date of filing is filled
FORM 26	Form 26 Deadline	Form-26 date of filing is filled
FER	FER Reply Deadline	Date of filing FER Reply is filled
FORM 3	FORM 3 deadline	FORM 3 date of filing is filled
FORM 18	Worked out by the app: 48 months from the priority date, or 31 months if the priority date is on or after 15 March 2024. The priority date is the PS date, or the CS date when there is no PS.	Form-18/18A date of filing is filled
HEARING	Date of hearing	Date of filing WS is filled
WRITTEN SUBMISSION (shown as **WS**)	WS Deadline	Date of filing WS is filled
RENEWAL	Date of Next Renewal (pending or overdue) and Date of Renewal (completed)	—

FORM 18 dues are only made once the CS is filed, and never for abandoned applications.

Filters and buttons

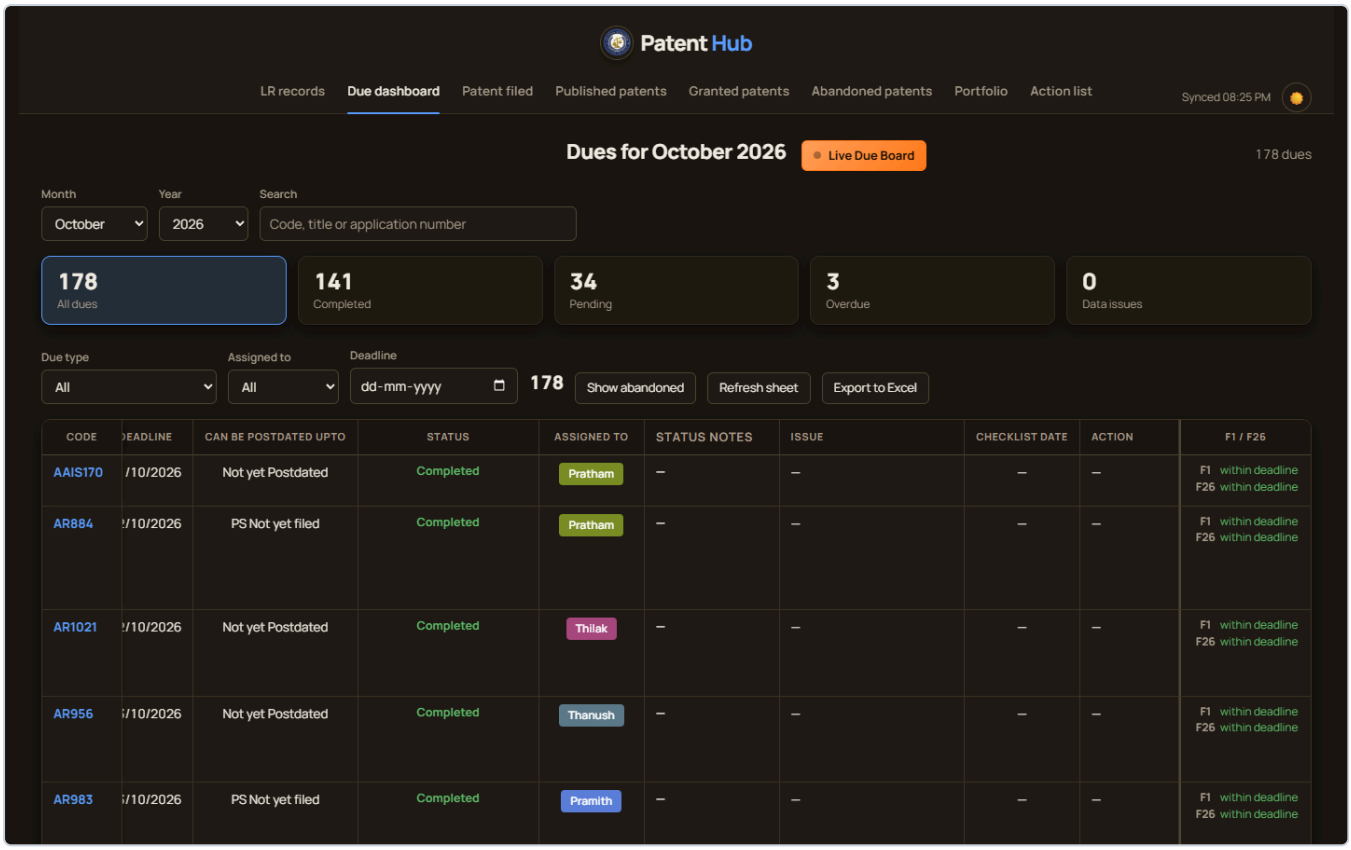

Control	Meaning
Month / Year	Which month to show. "All years" also sets "All months".
Search	Code, title or application number.
Due type	One due type only.
Assigned to	One person only. The list includes "Paralegal".
Deadline	One exact date. Click the calendar icon to pick it.

Control	Meaning
Show abandoned / Hide abandoned	Abandoned applications are hidden by default. Click **Show abandoned** to bring them back. They then carry a red **Abandoned** tag.
Live Due Board (orange)	Opens the TV screen (see chapter 6).
Refresh sheet / Export to Excel	See 2.3. The Excel file has the same fields as the due detail page, plus F1 Status and F26 Status.

Columns

Column	Meaning
Code	Click it to open the due detail page.
Application no.	Click it to copy.
Title / Applicant	From the sheet. Long text is cut short. Point at it to see all of it.
Due type / Deadline	What is due, and when.
Can be postdated upto	From the sheet's "Remaining Post-Date Months". Only PS-CS dues have this. A dash on other due types is normal.
Status	Completed (green), Pending (yellow) or Overdue (red). Overdue rows are tinted red.
Assigned to	Who does it (see the rules below).
Status notes / Issue / Checklist date / Action	Your own notes, typed in Patent Hub.
F1 / F26	Short Form 1 and Form 26 status from the sheet, for example "within deadline", "delayed 8d", "late 40d" or "12d left".

The table is wide. Scroll it sideways to see the last columns. The **Code** column stays in place while you scroll.

The same table scrolled right: Status notes, Issue, Checklist date, Action and F1 / F26.

Who a due is assigned to

- **PS-CS, Form 1, Form 26, Form 18:** the drafter in the sheet's "Assigned to" column.
- **FER and Form 3:** nobody at first. A senior assigns them in Patent Hub.
- **Hearing, Written Submission and Renewal:** always the same fixed person. Renewal goes to **Paralegal**. This is set inside the app and cannot be changed from the screen.

Paging: 100 dues per page on desktop, 25 on a phone.

Editing a due

Editing works like Excel, on desktop only.

1. **Double-click** a cell in **Status notes**, **Issue**, **Checklist date** or **Action**. For FER and Form 3 you can also double-click **Assigned to**.
2. Type the text, or pick the date or the person.
3. Press **Enter**, or click outside the cell, to save. A green "Saved" message appears.
4. Press **Esc** to cancel without saving.

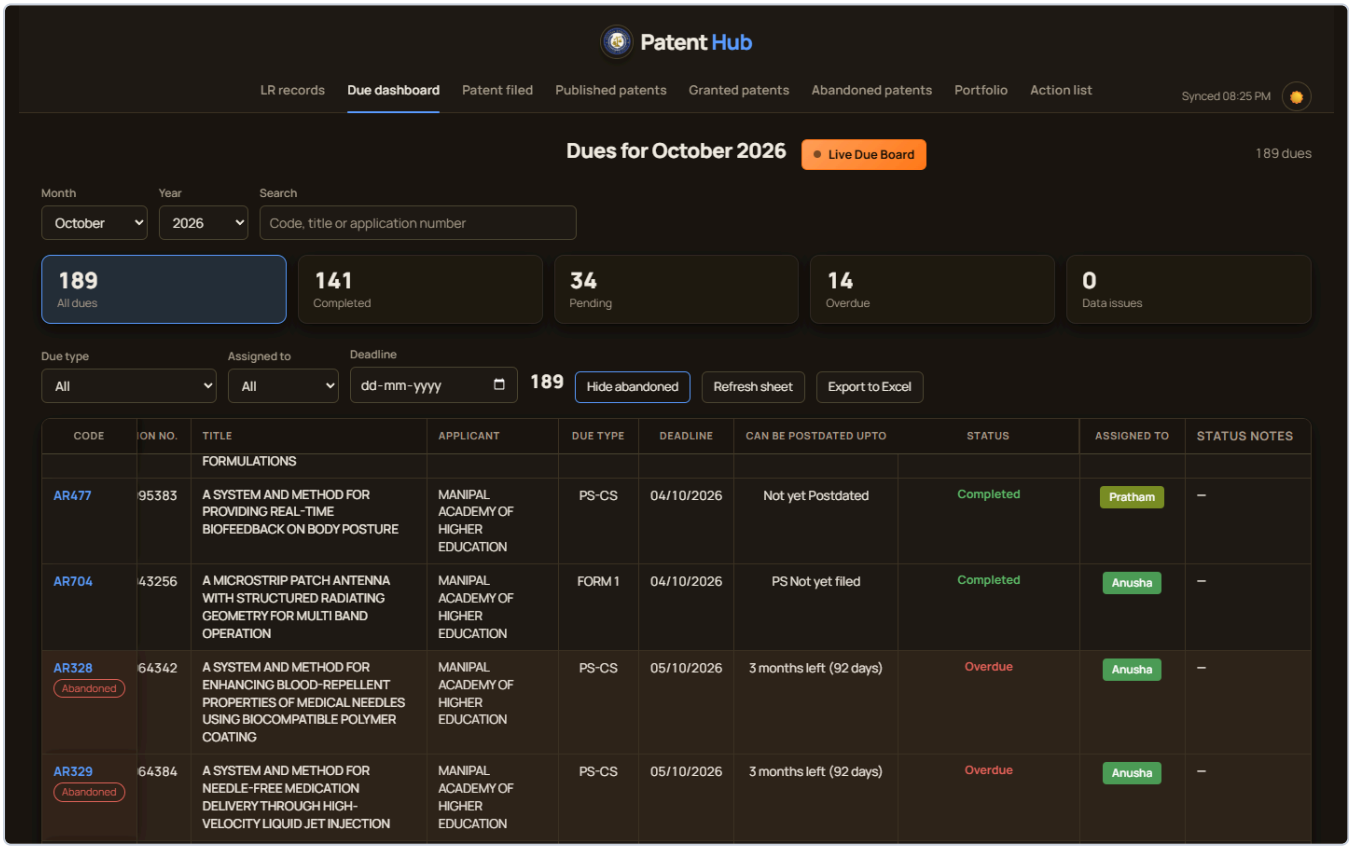

A Status notes cell open for typing (top right).

Hearing status. A Hearing is not marked overdue by itself. When the hearing date has passed and no WS is filed, a small dropdown appears next to its status. A senior picks **completed** or **overdue** there.

> Your notes belong to one due on one deadline date. If the deadline date changes in the sheet, the old notes stay with the old date and will not show on the new one.

Show abandoned

With "Hide abandoned" active, abandoned applications appear with a red "Abandoned" tag.

Due data issues

If a deadline cell in the sheet holds something that is not a date, the app cannot place that due in any month. The **Data issues** card counts these. Click it to see a table with these columns:

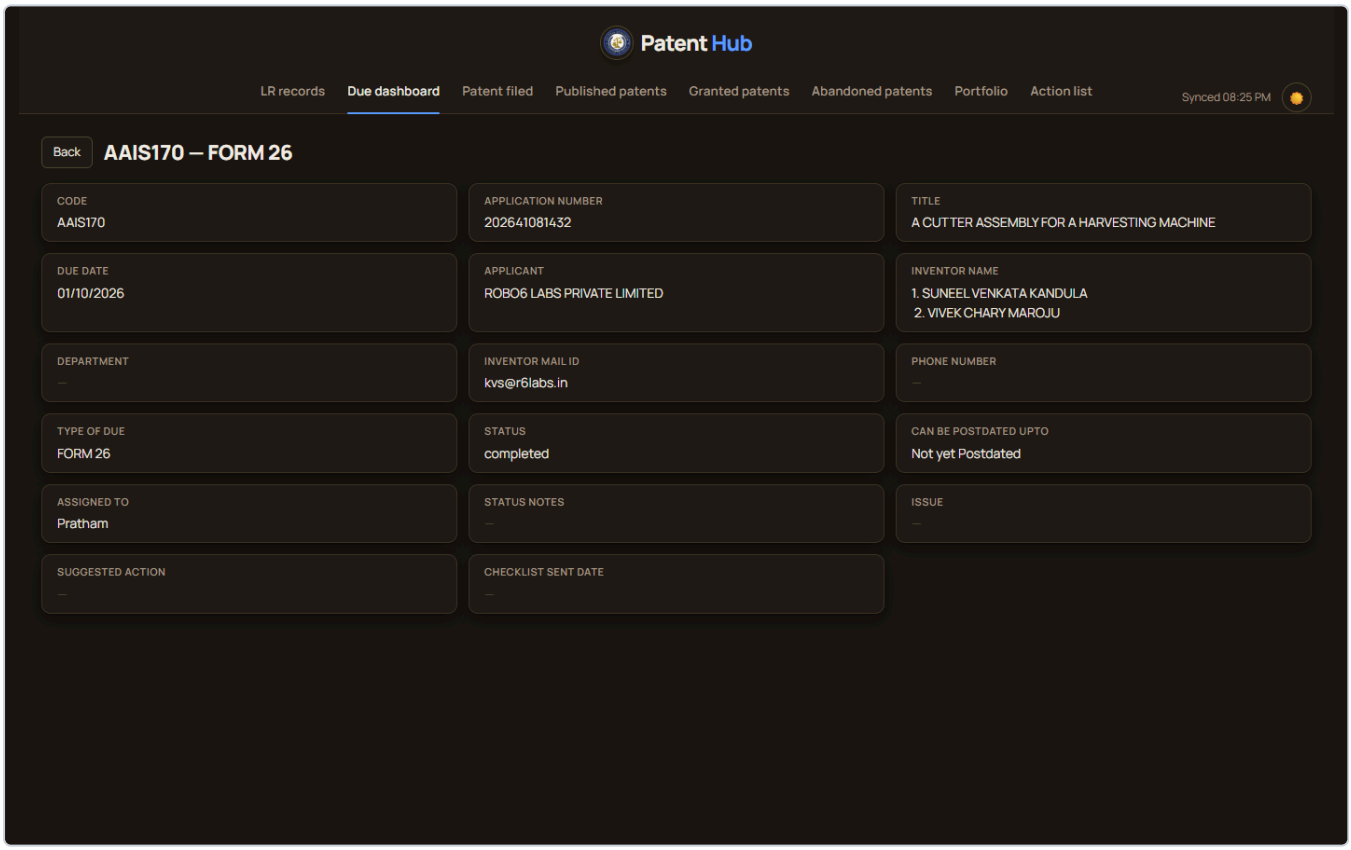

- **Code**
- **Due type**
- **Source column** (which sheet column)
- **Value in sheet**
- **Problem**:
  - `formula_error` means the cell shows an error such as `#REF!` or `#NUM!`.
  - `unparseable_date` means the text is not a real date, for example `31/09/2026`.

Fix the cell in the sheet and click **Refresh sheet**. The due then appears in its month. Click the card again to go back to the list. When the count is 0, there is nothing to fix.

The due detail page

Click a code to see everything about that due:

- Code, Application number, Title and Due date
- Applicant, Inventor Name, Department, Inventor mail ID and Phone number
- Type of due, Status, Can be postdated upto and Assigned to
- Status notes, Issue, Suggested action and Checklist sent date

The due detail page on desktop.

Common problems

- **A due I expect is not in the list.**
  - Check the month and year.
  - Check that no card or filter is still active.
  - It may be abandoned (click **Show abandoned**).

    - Its deadline cell may be unreadable (see the **Data issues** card).
- **I cannot edit a cell.** Editing works on desktop only. **Assigned to** can only be changed for FER and Form 3.
- "**Save failed".** The connection dropped or the server is busy. Try again in a moment.
- **My note disappeared.** The deadline date was changed in the sheet. The note is still saved on the old date.

6. Live Due Board (TV screen)

What it is for

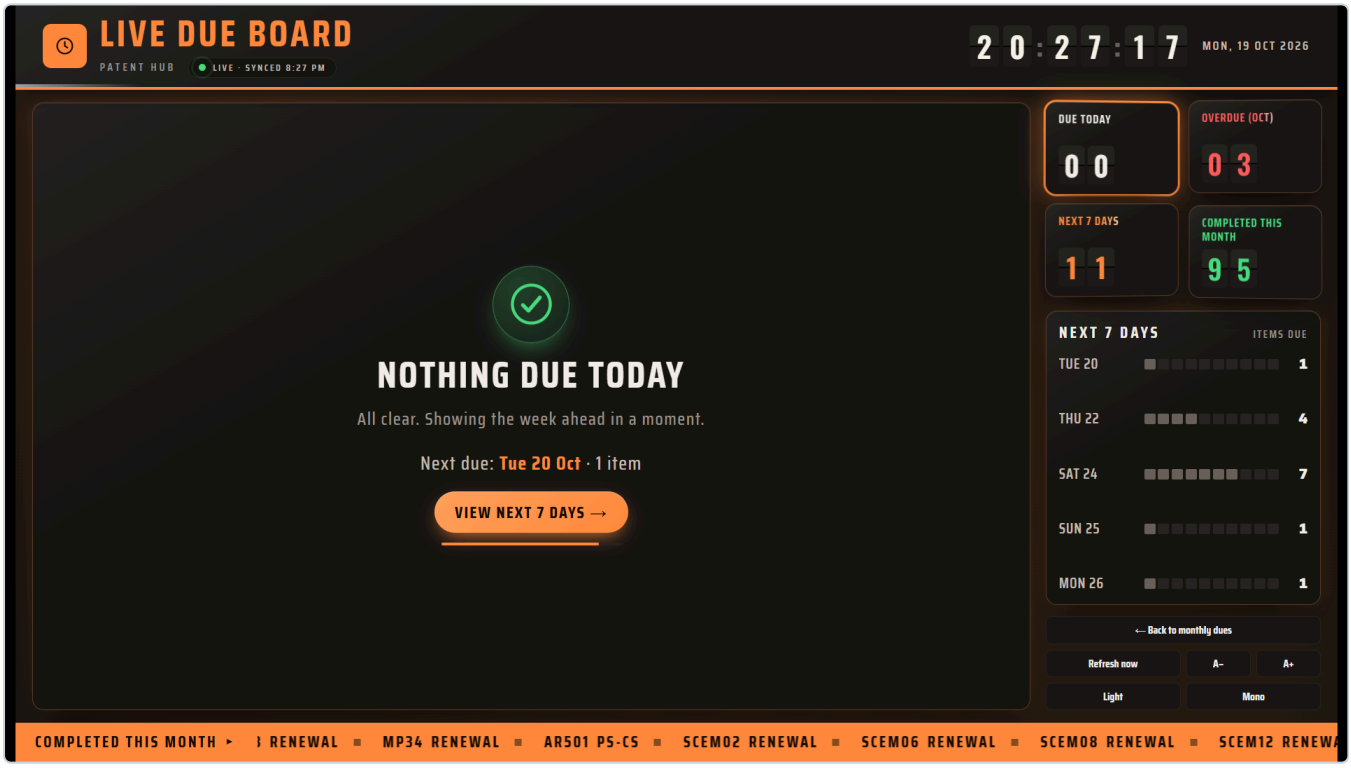

The Live Due Board is a big-screen view of the day's work, made for a TV or a large monitor in the office. It shows what is due today, what is overdue this month, what is coming in the next 7 days, and what was completed this month. It refreshes by itself.

Who uses it and when

The whole team, all day, on the office TV. Anyone can also open it on a computer for a quick look.

How to use it

1. Open the **Due dashboard** tab.
2. Click the orange **Live Due Board** button. The board tries to open in full screen.
3. Leave it running. It reloads its data every 60 seconds.
4. To leave, press **Esc** (leaves full screen) or click ← **Back to monthly dues**.

The board on a day with nothing due. It shows when the next due is, and moves to "Next 7 days" by itself after about 10 seconds.

The board showing "Next 7 days".

What everything means

Header: the board name, the **Live** · **Synced** time (when it last loaded data), a ticking clock and today's date.

The four cards (right side). Click a card to show that list in the big table.

Card	Meaning
Due today	Not completed, deadline today. This is the default list.
Overdue (month)	Overdue dues whose deadline is in **this calendar month**. Older overdue items are on Action list → Overdue.
Next 7 days	Not completed, deadline in the next 7 days (after today).
Completed this month	Dues completed this month.

The big table: Due, Code, Type, Title, Inventor, Assigned and Status (PENDING, OVERDUE or COMPLETED).

- In "Next 7 days", tomorrow's rows carry a **TOMORROW** tag.
- The table shows 5 rows per page. With more rows, pages change every 12 seconds.
- The bar at the bottom shows how long the current page stays on screen.

Page controls:

Control	Meaning
‹ / ›	Previous page / next page.
⏸ Auto / ▶ Paused	Stops or restarts the automatic page change.

Control	Meaning
Keyboard / TV remote	← → change page. Space pauses or resumes.

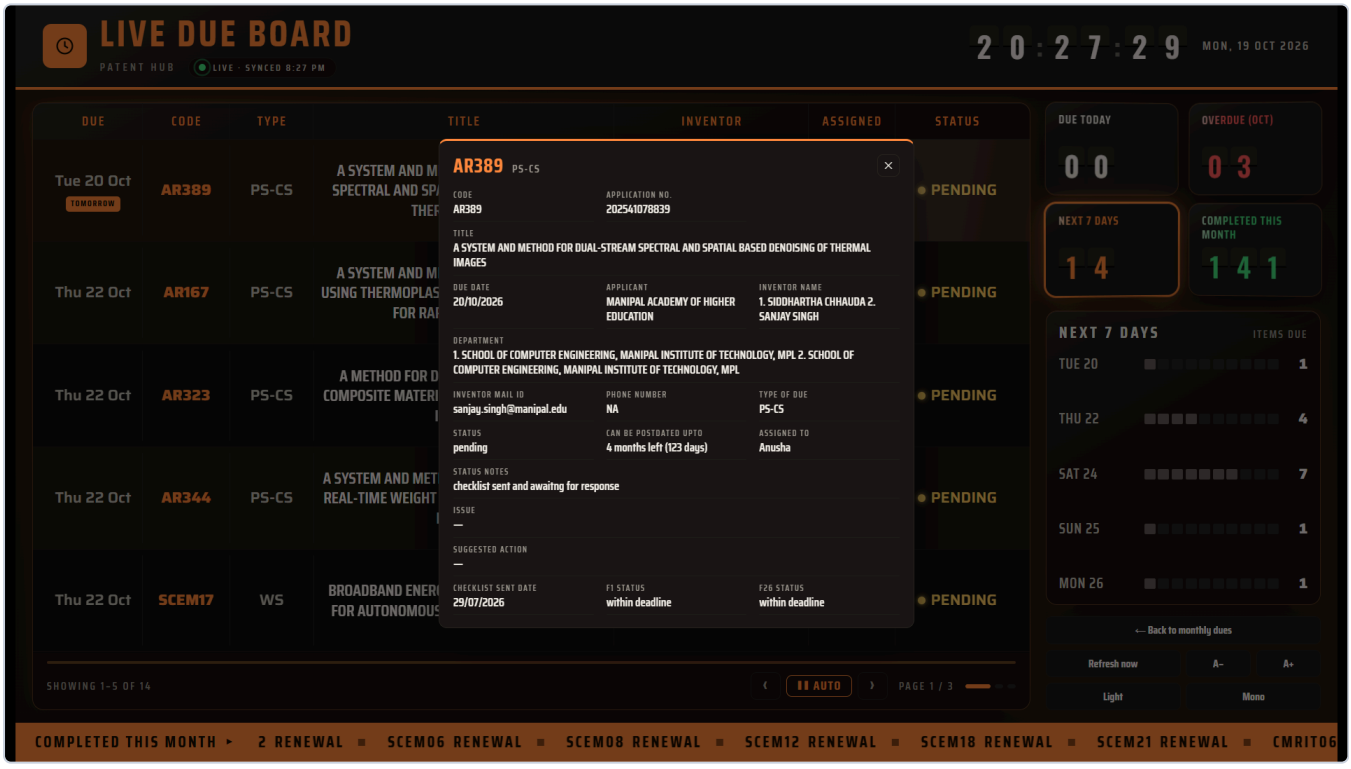

Next 7 days panel: one bar per day, with the number of items due that day.

Buttons (bottom right):

Button	Meaning
← Back to monthly dues	Returns to the Due dashboard.
Refresh now	Reloads the data at once.
A− / A+	Makes the text smaller or bigger. The board remembers your choice.
Light / Dark	Switches the colour theme.
Mono / Colour	Switches to a plain one-colour style and back.
Full screen	Fills the whole screen. It only shows when the board is not already full screen.

Ticker (bottom strip): a moving list of the codes completed this month.

Details popup. Click any **Code** in the table to see all of that due's details, the same fields as the Due dashboard export. Close it with ×, **Esc** or a click outside. It closes by itself after one minute.

The details popup for one due.

> Abandoned applications never appear on the Live Due Board.

Common problems

- **The board looks different on my laptop.** The TV layout needs a screen at least 850 pixels tall. On a smaller screen you get a simpler "Live Due Tracker" layout that scrolls normally. Click **Full screen** to get the TV layout.
- **It did not open in full screen.** Some browsers block automatic full screen. Click **Full screen**.
- "**Last sync failed".** The board could not load new data. It keeps showing the last data and tries again every minute.
- **Text is too big or too small.** Use **A−** / **A+**.

7. Patent filed

What it is for

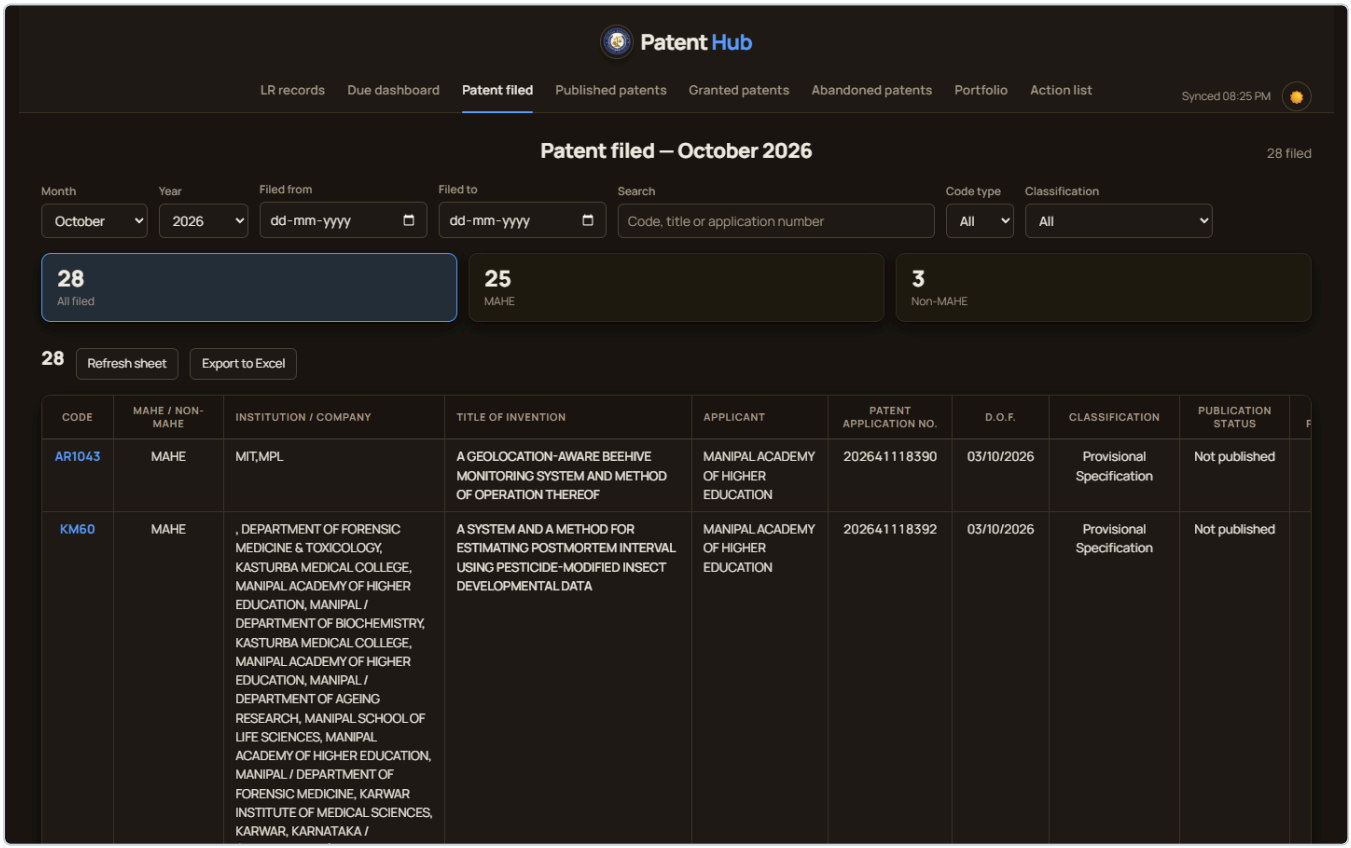

Patent filed lists every application filed in a month, with how it was filed: Provisional (PS), Complete (CS) or PS-CS. It also helps track how much postdating time a provisional still has.

Who uses it and when

Seniors and the team, for monthly filing counts and reports, and to watch provisionals that still need a CS.

How to use it

1. Click the **Patent filed** tab. It opens on the current month.
2. Pick the **Month** and **Year**, or an exact range with **Filed from** and **Filed to**.
3. Narrow it with **Search**, **Code type** and **Classification**.
4. Click a MAHE / Non-MAHE card to see only that group.
5. Click a **Code** for its details.

Patent filed for the current month.

What everything means

Classification. Each patent has exactly one:

Classification	Meaning	D.O.F. (date of filing) shown
Provisional Specification	Only a PS date	PS date
Complete Specification	Only a CS date (a direct CS)	CS date
PS-CS	Both dates	CS date

A PS-CS patent is listed **once**, in the month of its CS, not in its PS month.

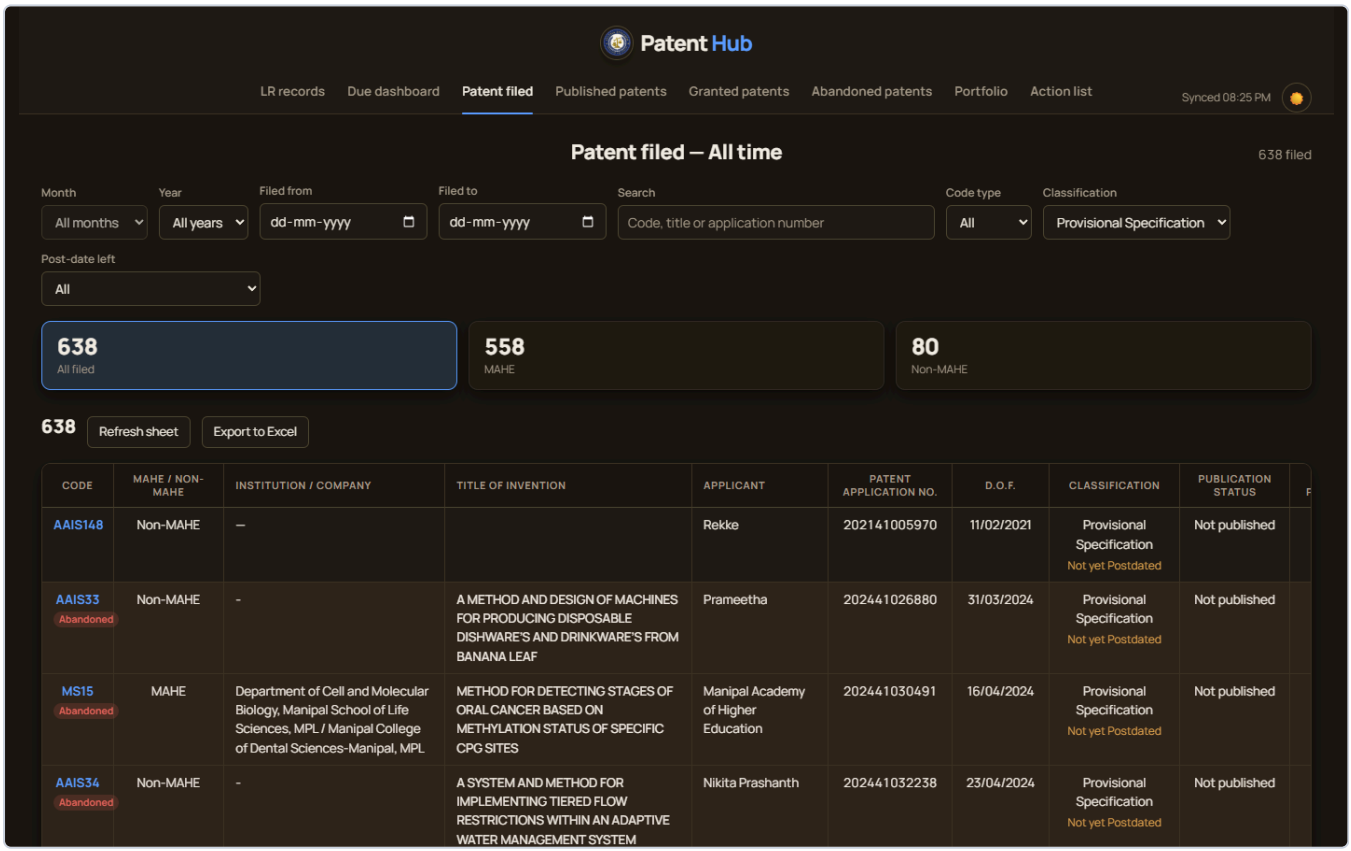

Classification filter options:

- **All** (default): every patent once.
- **Both PS and CS**: Provisional plus Complete, with PS-CS left out.
- **PS-CS**, **Provisional Specification** or **Complete Specification**: only that kind.

Post-date left (only appears when Classification = Provisional Specification). This groups provisionals by how much postdating time is left. It uses the number of days in the sheet's "Remaining Post-Date Months", counted at 30 days a month.

- Not yet postdated (6 months)
- 6 months left (180 days)
- 5, 4, 3, 2, 1 or 0 months left
- Blank in sheet

Picking a group leaves out abandoned rows. Set **Year = All years** to see every provisional.

Classification = Provisional Specification shows the Post-date left filter. Each row shows its post-date text under the classification.

Cards: All filed, MAHE, Non-MAHE, and Unclassified (only when there are any).

Columns:

- Code
- MAHE / Non-MAHE
- Institution / Company
- Title of invention
- Applicant
- Patent application no.
- D.O.F.
- Classification
- Publication status (Published / Not published)
- Date of publication

Abandoned rows are tinted and carry an **Abandoned** tag.

Export to Excel makes one sheet per Code type. It also adds the inventor names, and the Code cell of abandoned rows is shaded.

Common problems

- **A patent is in the wrong month.** For PS-CS the month is the **CS** month. Check the dates in the sheet.
- **I cannot pick a future month.** For the current year, the month list stops at this month.
- **Post-date left shows "Blank in sheet".** "Remaining Post-Date Months" is empty, or has no "(N days)" in it. Fill it in the sheet.

8. Published patents

What it is for

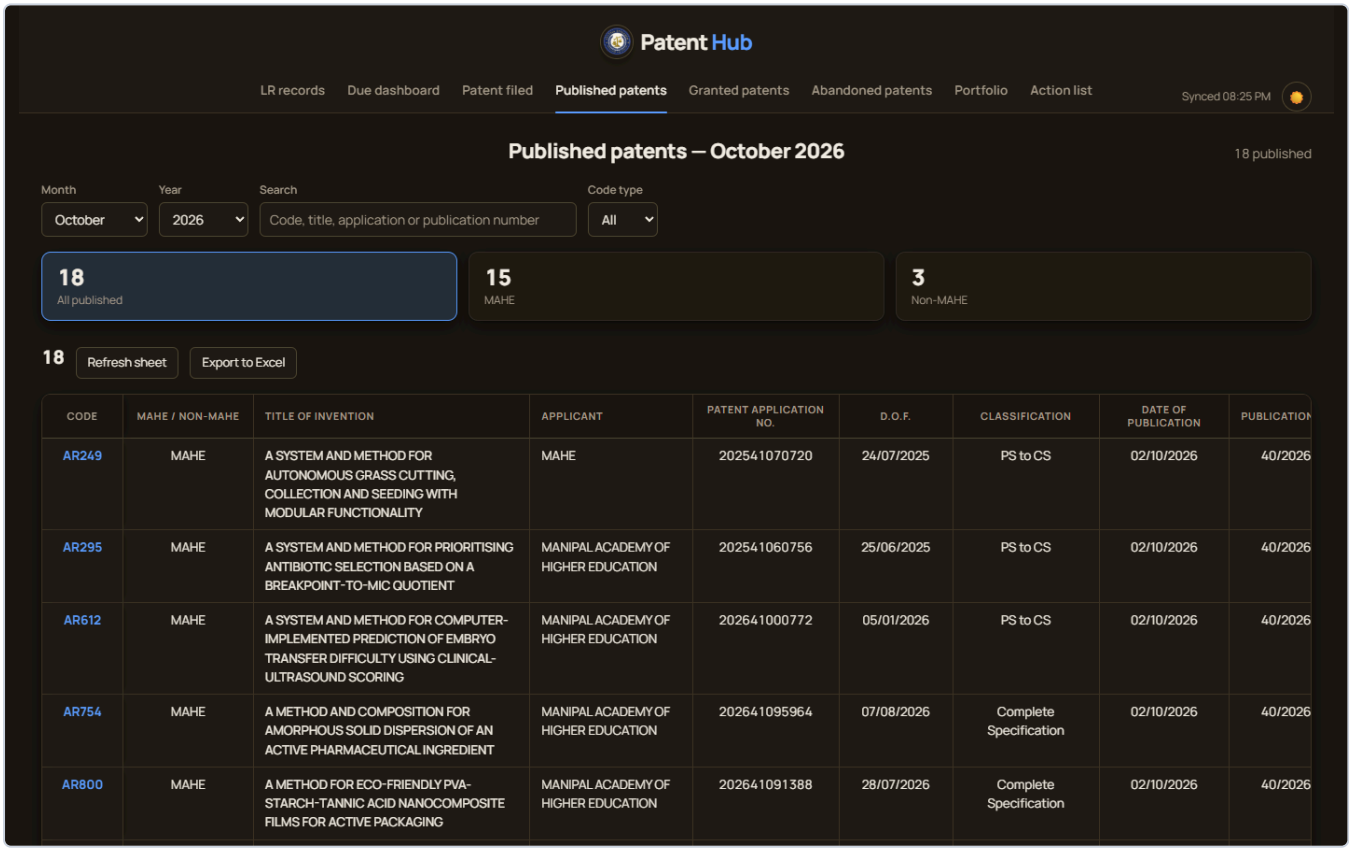

Published patents lists every application published in a month, with its publication number and whether Form 18 is filed.

Who uses it and when

Seniors and the team, for monthly publication reports and to check Form 18 after publication.

How to use it

1. Click the **Published patents** tab. It opens on the current month.
2. Pick the **Month** and **Year**. "All months" and "All years" are also offered.
3. Use **Search** (code, title, application or publication number) and **Code type**.
4. Click a MAHE / Non-MAHE card to filter.
5. Click a **Code** for details.

Published patents for the current month.

What everything means

Columns:

- Code
- MAHE / Non-MAHE
- Title of invention
- Applicant
- Patent application no.
- D.O.F.
- Classification
- Date of publication
- Publication no.
- Form 18 filed (Yes / No)

On this tab, **D.O.F.** is the PS date when there is one, otherwise the CS date. **Classification** reads "PS to CS" or "Complete Specification". This is different from Patent filed on purpose: it records how the application started.

Abandoned rows are tinted and tagged. **Export to Excel** also adds inventor names and Institution / Company.

Common problems

- **A publication is missing.** The "Date of Publication" cell is empty or is not a real date. Fix it in the sheet.

9. Granted patents

What it is for

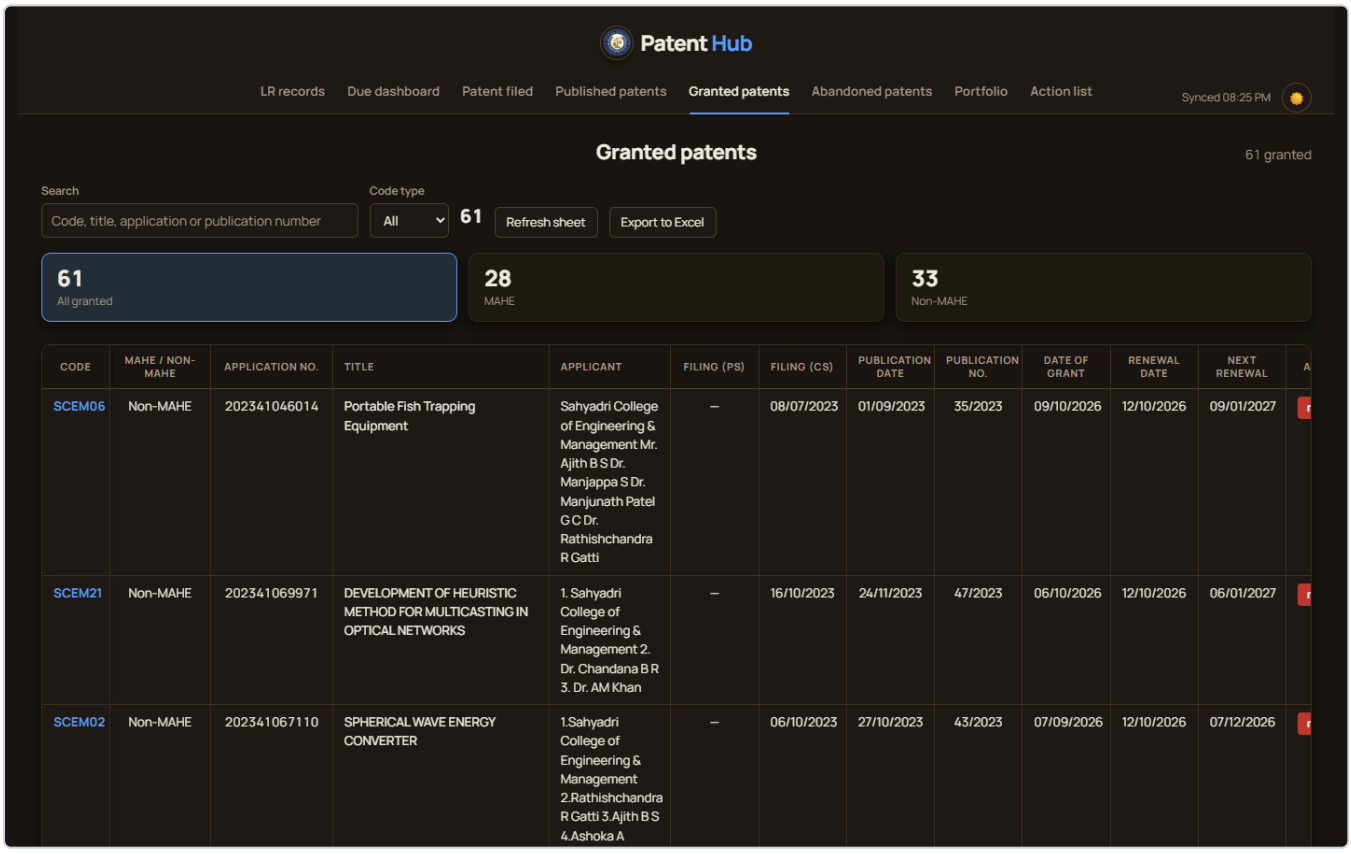

Granted patents lists every granted patent, newest grant first, with its renewal dates. A late renewal stands out in red.

Who uses it and when

The paralegal and seniors, to track renewals and to answer "which patents are granted?".

How to use it

1. Click the **Granted patents** tab. It always shows all years.
2. Use **Search** (code, title, application or publication number) and **Code type**.
3. Click a MAHE / Non-MAHE card to filter.
4. Look for red rows: those renewals are overdue.

Granted patents. Rows whose next renewal date has passed are tinted red.

What everything means

Columns:

- Code
- MAHE / Non-MAHE
- Application no.
- Title
- Applicant
- Filing (PS) and Filing (CS)
- Publication date and Publication no.
- Date of grant
- Renewal date (the last renewal done)
- Next renewal
- Assigned to

On a phone, each card has a renewal tag, for example "Renewal 05/11/2027" or a red "Renewal overdue · date".

Common problems

- **A renewal shows overdue but it was paid.** Update "Date of Renewal" and "Date of Next Renewal" in the sheet, then **Refresh sheet**.

10. Abandoned patents

What it is for

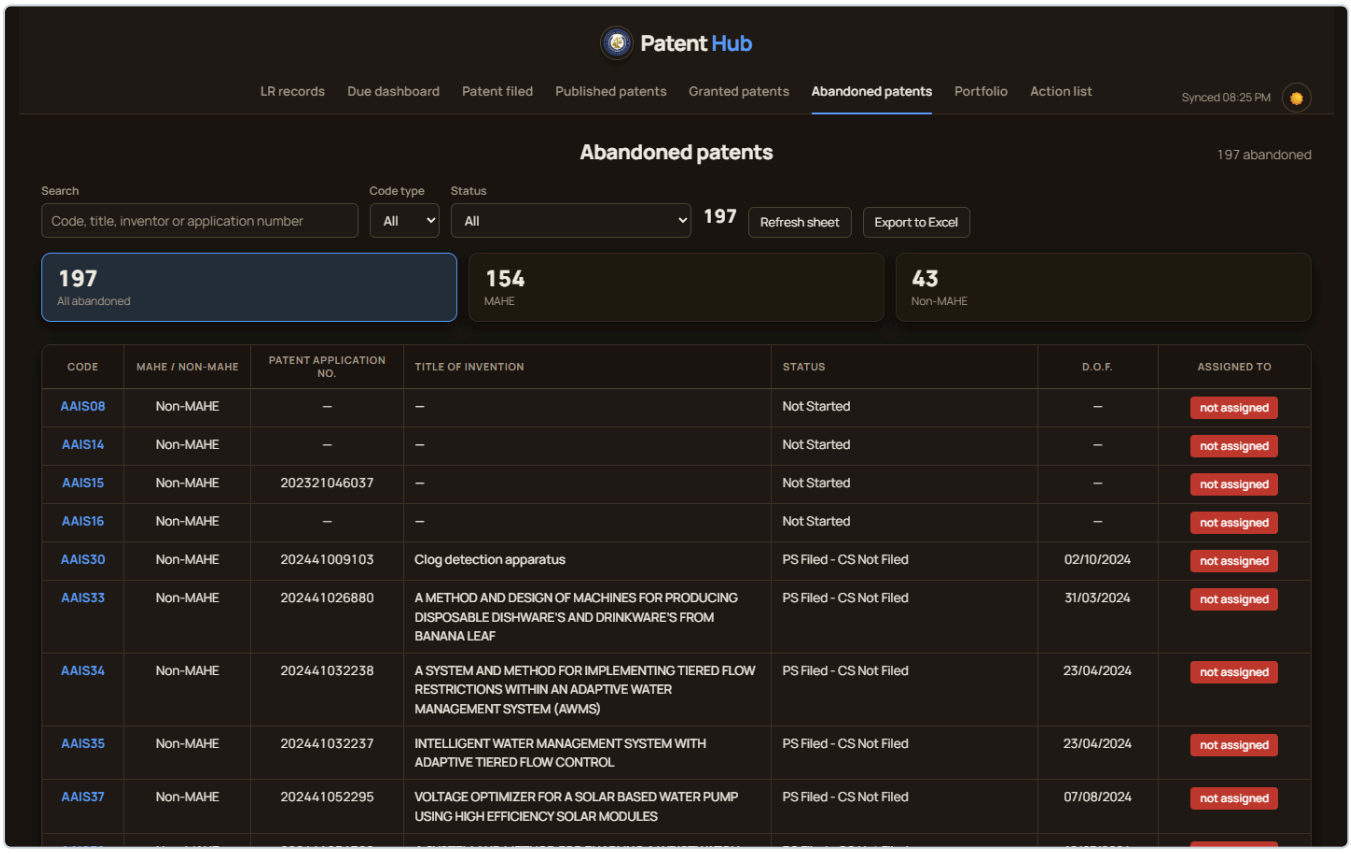

Abandoned patents lists every application marked as abandoned, together with how far it got before it was dropped.

Who uses it and when

Seniors, to review dropped applications and to answer client questions about them.

How to use it

1. Click the **Abandoned patents** tab.
2. Use **Search** (code, title, inventor or application number), **Code type** and **Status**.
3. Click a MAHE / Non-MAHE card to filter.
4. Click a **Code** for details.

Abandoned patents.

What everything means

- **How an application becomes "abandoned":** someone fills its **Code cell in red** in the LR Sheet. There is no separate abandoned column.
- **Status** is the sheet's STATUS text, for example "PS Filed - CS Not Filed". It shows how far the application got. If STATUS is blank, it stays blank.

- **D.O.F.** is the CS date, or the PS date when there is no CS.
- **Columns:** Code, MAHE / Non-MAHE, Patent application no., Title of invention, Status, D.O.F., Assigned to.
- **Export to Excel** makes a MAHE sheet and a Non-MAHE sheet (plus Unclassified, if any). It adds inventors, applicant, publication, Form 9 filed and Form 18 filed.

What "abandoned" changes on other tabs:

- **Patent filed / Published:** tinted with an **Abandoned** tag.
- **Due dashboard / Overdue:** hidden unless you click **Show abandoned**.
- **Live Due Board, F1/F26, F9/F18:** left out.
- **Client portfolio:** shown with the stage "Abandoned".
- **Granted:** not affected.

Common problems

- **An abandoned application is not listed.** The Code cell must be filled with a clear **red**. Light pink or orange does not count.
- **A red warning says the red Code cells could not be read.** The app could not read the cell colours this time, so the list may be incomplete. Click **Refresh sheet**. If it keeps happening, tell the app owner.
- **Revived an application?** Remove the red fill from its Code cell.

11. Client portfolio

What it is for

Client portfolio shows every application of one inventor, or of a group of inventors, and exports it to Excel. Use it when someone asks for a full list of their patents.

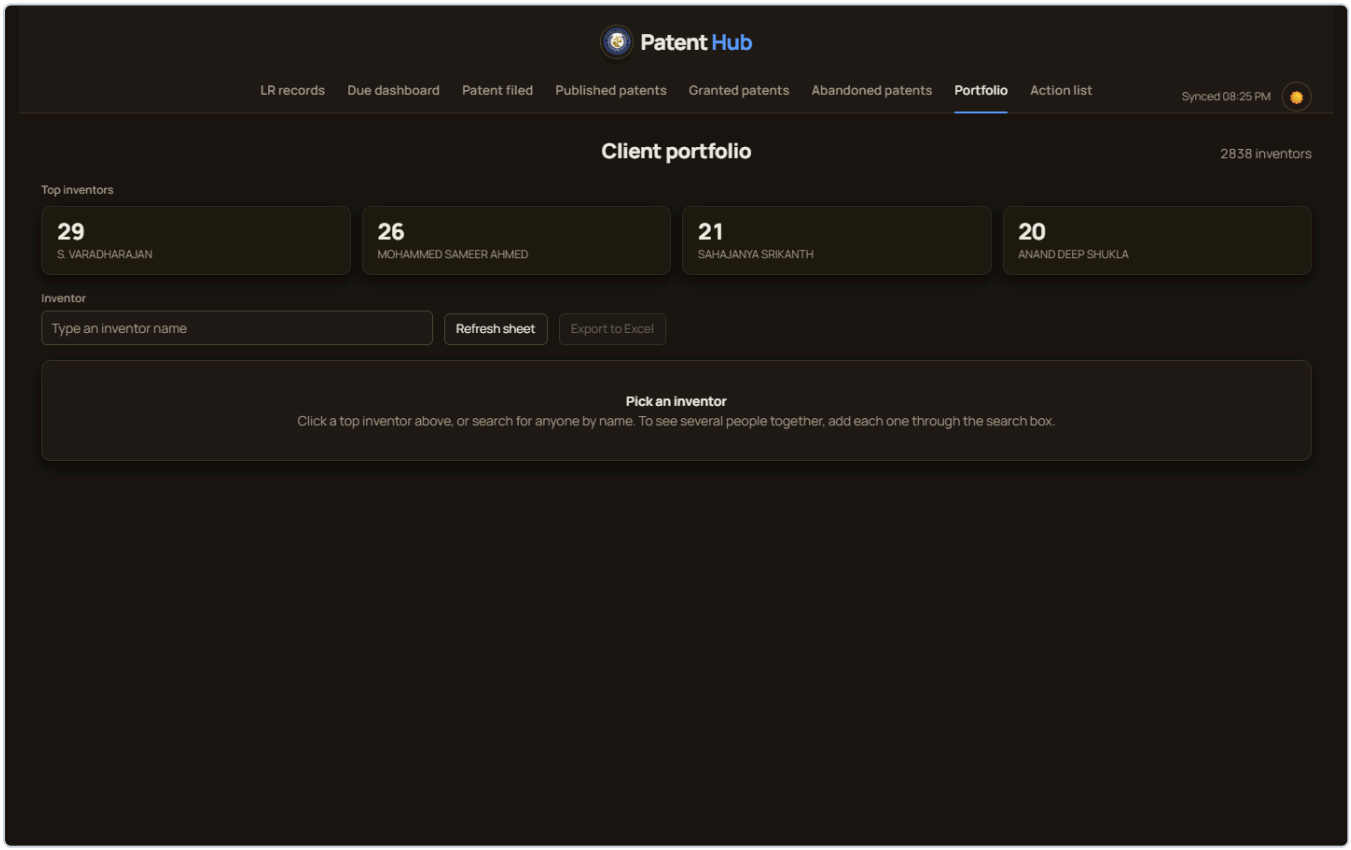

Who uses it and when

Anyone preparing a portfolio list for an inventor or a department.

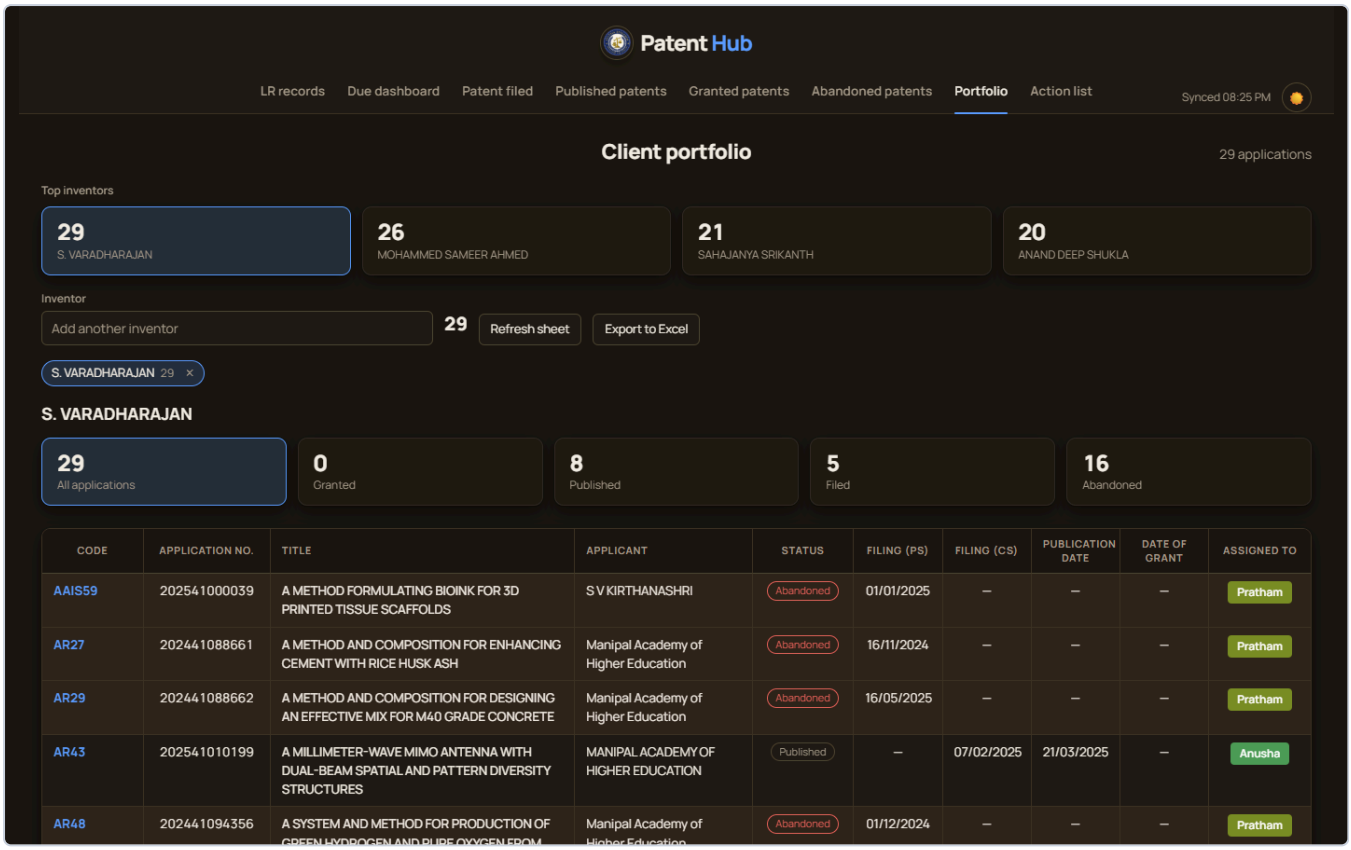

How to use it

One inventor

1. Click the **Portfolio** tab.
2. Click one of the four **Top inventors** cards (the people with the most applications), **or** type a name in **Inventor** and pick it from the list.
3. Click **Export to Excel** to download the list.

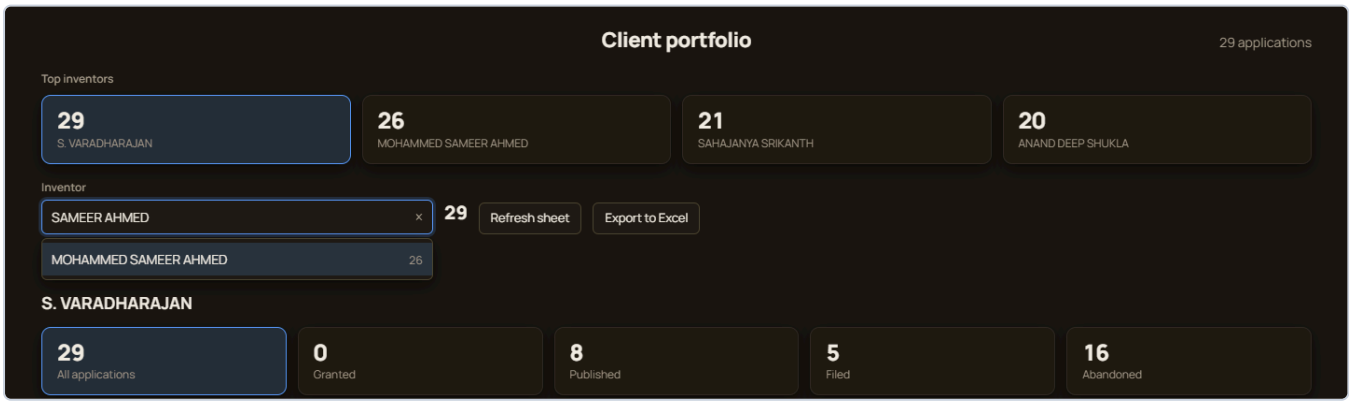

Client portfolio before anyone is picked.

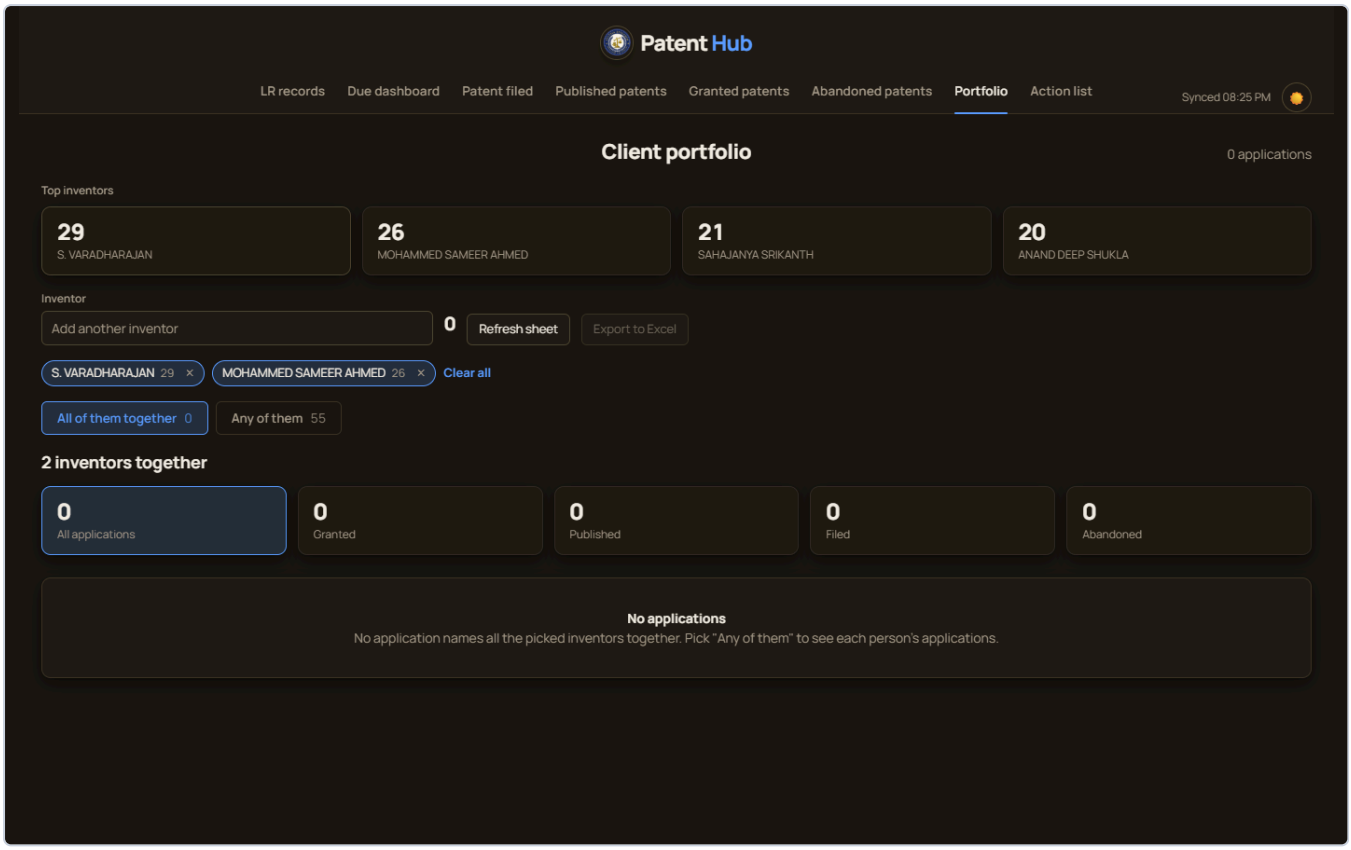

One inventor picked.

Several inventors

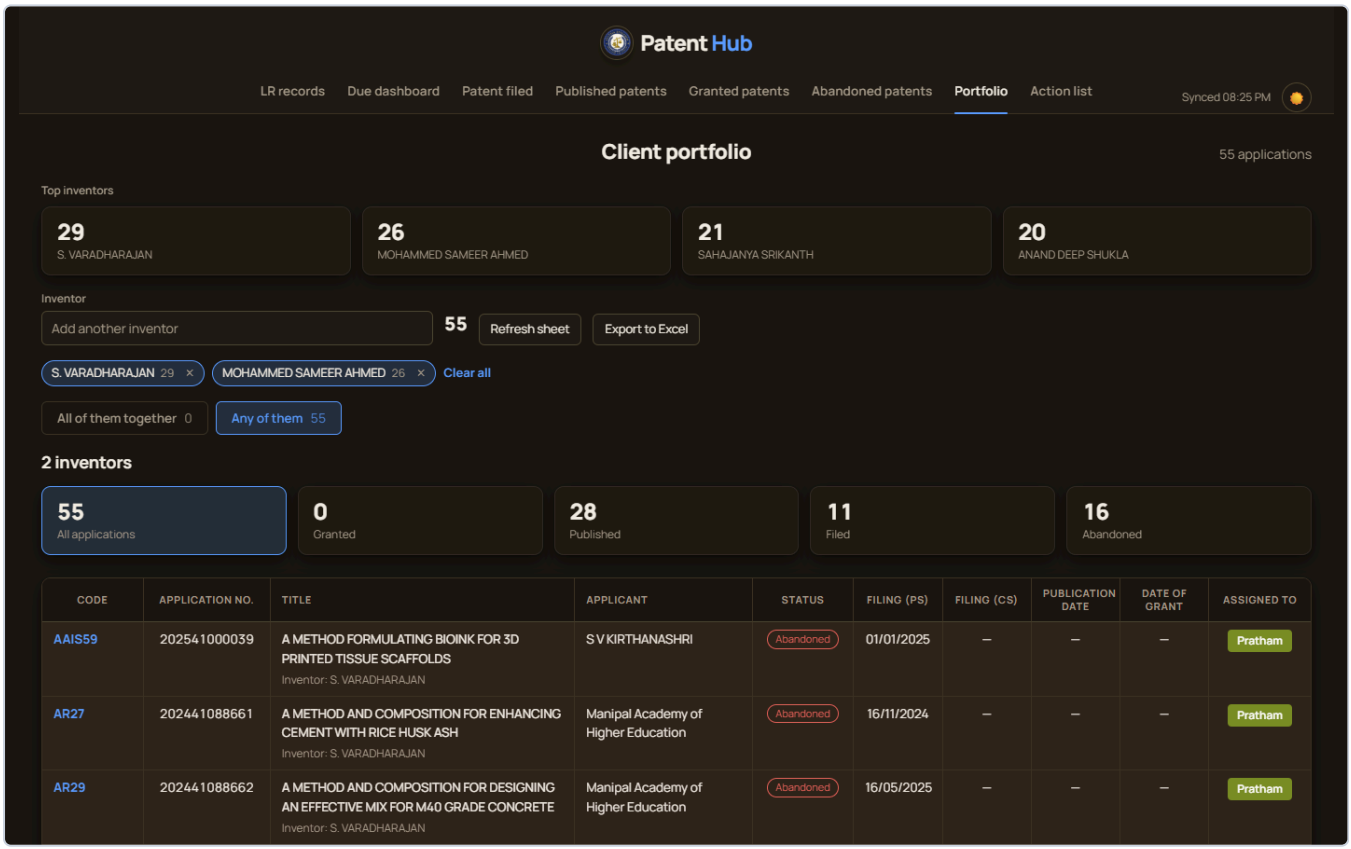

1. Pick the first person.
2. Type the next name in the box (it now says "Add another inventor"). Pick from the list with the mouse, or with the arrow keys and **Enter**. The number next to each name is how many applications name that person.
3. Each picked person shows as a chip. Click × on a chip to remove that person, or **Clear all** to start again.
4. Choose which applications to show:
   - **All of them together** (default): only applications that name **every** picked person.
   - **Any of them**: every application that names **any** picked person, each listed once. A line under the title says which picked people it names.

Typing in the Inventor box shows matching names and their counts.

Two inventors with no shared application: "All of them together" shows none.

The same two inventors with "Any of them".

What everything means

Top inventor cards. Click one to show only that person. This replaces any earlier picks. Click it again to clear.

Stage cards (click to filter):

Card	Meaning
All applications	Every matching application.
Granted	Has a date of grant.
Published	Published, not granted yet.
Filed	PS or CS filed, not published yet.
Not filed	No filing date yet. Only shows when there are any.
Abandoned	Red Code cell. Abandoned always wins over the other stages.

Columns: Code, Application no., Title, Applicant, Status (the stage), Filing (PS), Filing (CS), Publication date, Date of grant, Assigned to.

"Name needs check" tag. That application was found by a plain text search, because its Inventor Name cell is not in the `1. Name` format. A yellow note above the table counts these. Check them before you send the list.

How names are matched

- The sheet's Inventor Name cell must hold one inventor per line: `1. Name`, `2. Name` and so on.
- Matching ignores capital letters, dots and commas, and titles such as Dr., Prof., Mr. and Mrs. So "Dr. S.V. Kumar" and "s v kumar" are the same person.
- A **different spelling is a different person** until it is fixed in the sheet.
- Blank or "NA" cells add nobody.
- You can pick up to 50 people at once.

Common problems

- **The same person appears twice in the list.** Two spellings exist in the sheet. Make them the same in the sheet, then **Refresh sheet**.
- **An application is missing for a person.** Its Inventor Name cell may be blank, "NA", or spelled differently. Check Action list → Data issues → **Inventor name issues**.
- **"No application names all the picked inventors together".** Switch to **Any of them**.

12. Action list

What it is for

Action list gathers the four "things to act on" pages in one tab: **Overdue**, **F1/F26 delayed or pending**, **F9/F18 pending** and **Data issues**.

How to use it

1. Click the **Action list** tab. It opens on **Overdue**.
2. Click a button at the top to switch section.
3. Each section keeps its own filters while you switch. When you come back from a detail page, you land on the same section.

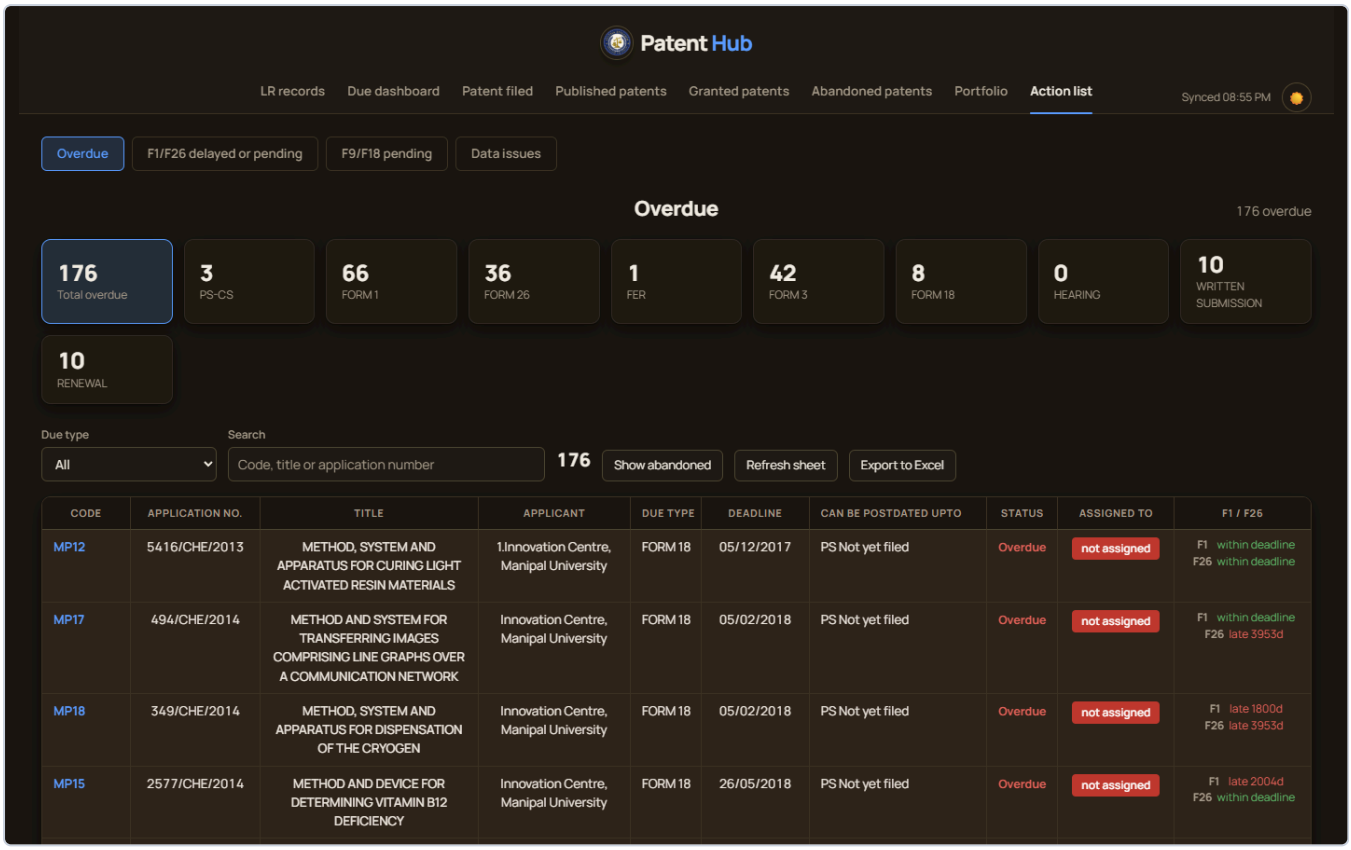

12.1 Overdue

What it is for. Every overdue due across **all months and years** in one list.

Who uses it and when. Seniors and drafters, daily, to chase late work.

How to use it

1. Click a due-type card to see only that type.
2. Use **Due type** and **Search** to narrow it down.
3. Click **Show abandoned** to include abandoned applications.
4. Click a **Code** to open the due detail page.

Overdue: one card per due type, then the list.

What everything means

- **Cards:** Total overdue, then one card per due type (PS-CS, FORM 1, FORM 26, FER, FORM 3, FORM 18, HEARING, WRITTEN SUBMISSION, RENEWAL).
- **Columns:** Code, Application no., Title, Applicant, Due type, Deadline, Can be postdated upto, Status, Assigned to, F1 / F26.
- This list is **view-only**. To add notes, open the Due dashboard on that due's month.

Common problems

- **A Hearing is not listed as overdue.** Hearings never turn overdue by themselves. A senior sets it on the Due dashboard.
- **Something is no longer overdue.** Its filing date was added to the sheet. It now counts as completed.

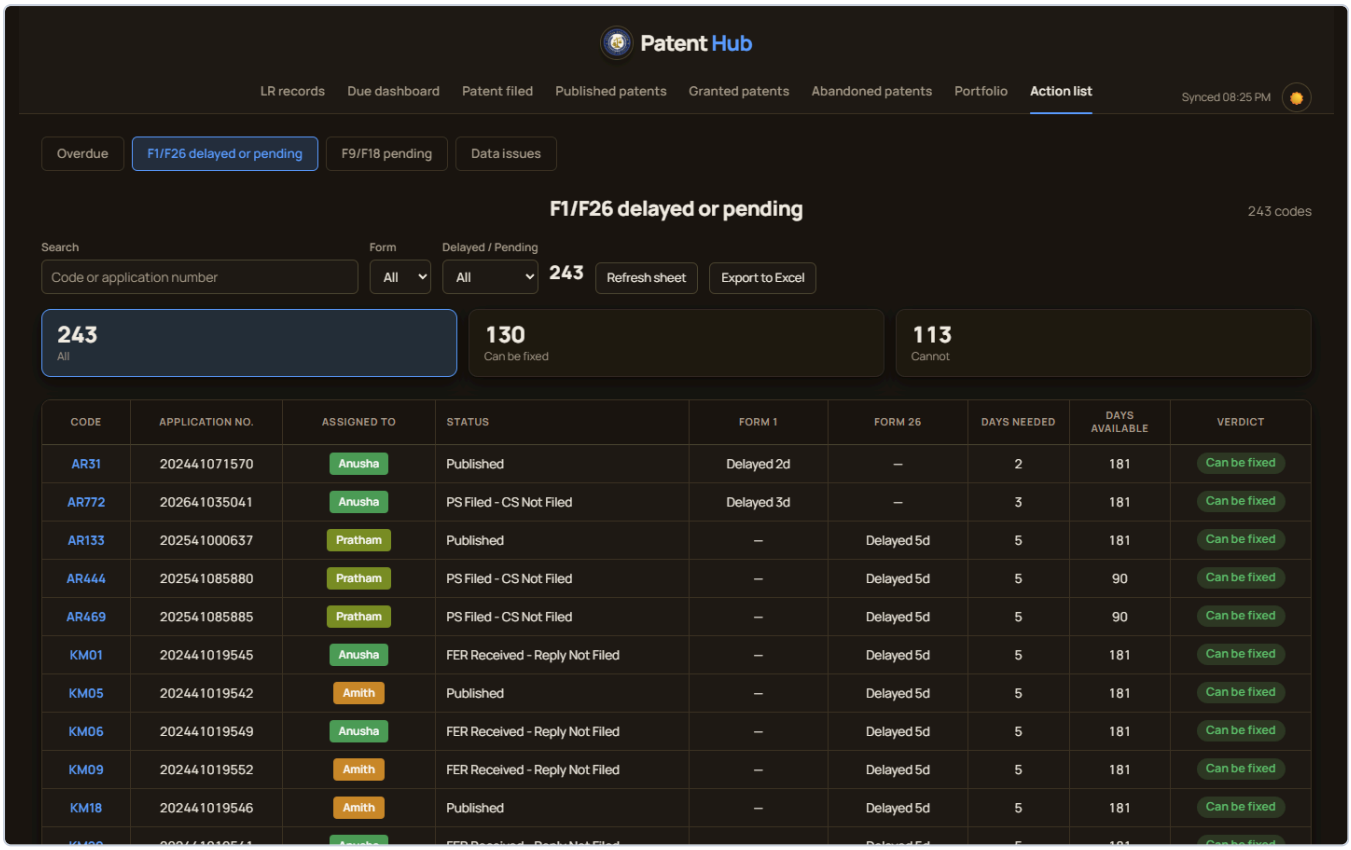

12.2 F1/F26 delayed or pending

What it is for. Lists every application where **Form 1** or **Form 26** was filed late (**Delayed**), or is still not filed after its deadline (**Pending**). It also says whether **postdating** can still fix it.

Who uses it and when. Seniors, to decide which applications need postdating.

How to use it

1. Click **All**, **Can be fixed** or **Cannot**.
2. Use **Search** (code or application number), **Form** (All, F1 or F26) and **Delayed / Pending**.
3. Click a **Code** to see the PS, CS, Form 1 and Form 26 dates.

F1/F26 delayed or pending.

What everything means

Column	Meaning
Form 1 / Form 26	"Delayed Nd" (filed N days late) or "Pending Nd" (N days past the deadline, still not filed).
Days needed	The bigger of the two days-late numbers. Postdating must cover the worse form.
Days available	From the sheet's "Remaining Post-Date Months": the "(N days)" in the text, or 181 for "Not yet Postdated" / "PS Not yet filed".
Verdict	**Can be fixed** when days needed ≤ days available, otherwise **Cannot**. It shows **Unknown** when the post-date text is not one of the known forms.

- A red banner lists any codes with an **Unknown** verdict.
- The list is sorted with "Can be fixed" first, then by the fewest days needed.
- Abandoned applications and those with STATUS "Patent Granted" are left out.
- **Export to Excel** makes a "Can be fixed" sheet and a "Cannot" sheet, plus "Unknown" if there are any.

Common problems

- **Verdict is "Unknown".** Write "Remaining Post-Date Months" in the sheet as "Not yet Postdated" or as "N months left (D days)".

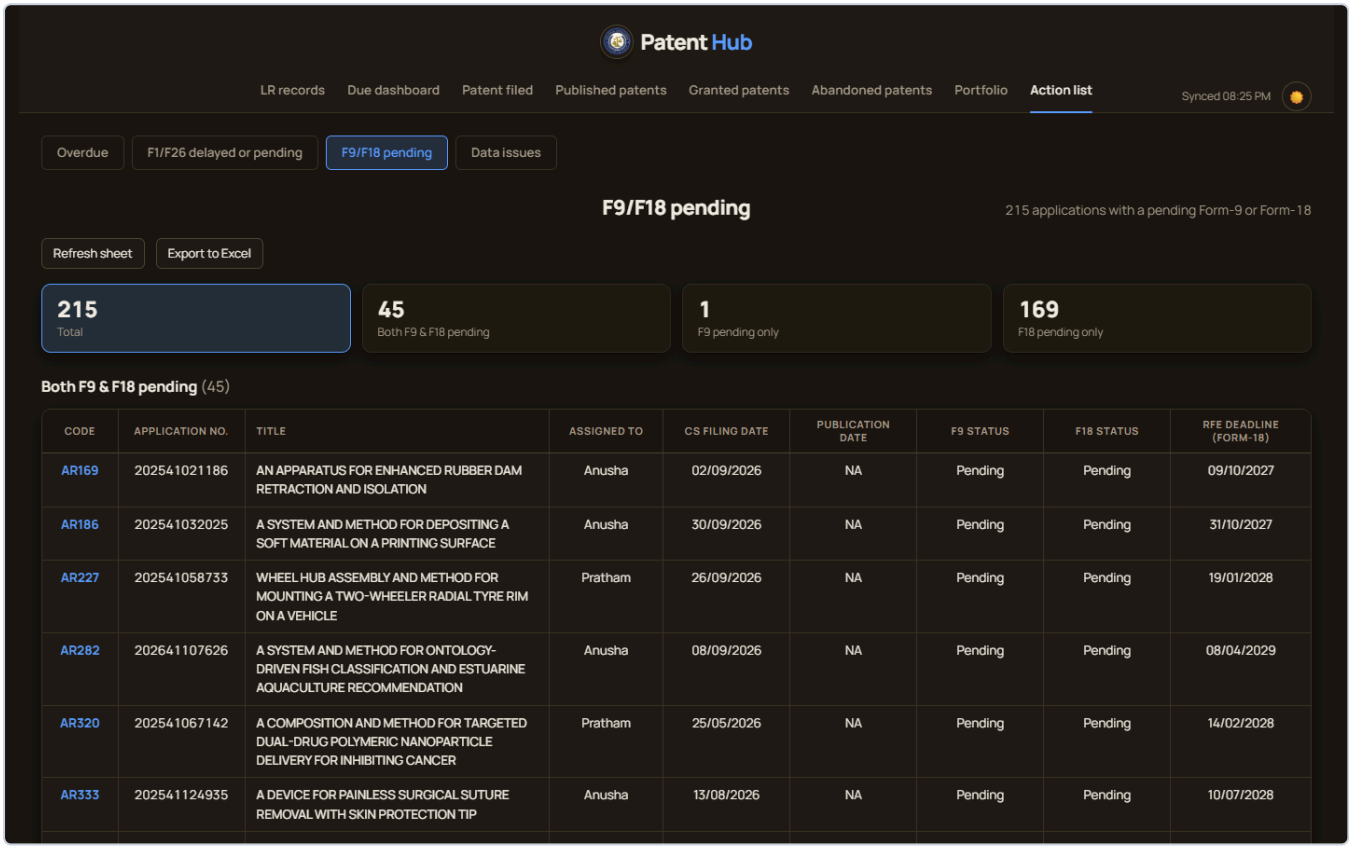

12.3 F9/F18 pending

What it is for. Lists applications whose CS is filed but whose **Form 9** and/or **Form 18** is not filed yet. Each row shows the Form 18 (RFE) deadline.

Who uses it and when. Seniors and drafters, to make sure no request for examination is missed.

How to use it

1. Click a card: **Total**, **Both F9 & F18 pending**, **F9 pending only** or **F18 pending only**.
2. With **Total**, the page shows three tables, one per group.
3. Click a **Code** for details.

F9/F18 pending, in three groups.

What everything means

- **Columns:** Code, Application no., Title, Assigned to, CS filing date, Publication date, F9 status, F18 status, RFE deadline (Form-18).
- **F9** only counts as pending while the application is **not yet published**. After publication it shows "Not applicable (published)".
- **RFE deadline** is 48 months from the priority date, or 31 months if the priority date is on or after 15 March 2024. A deadline that has passed is shaded red.
- Abandoned applications are left out.
- **Export to Excel** has one sheet per group and one per data-check list.

Common problems

- **An application is here but Form 18 was filed.** The "Form-18/18A date of filing" cell is empty, or says "Not filed". Fill in the date in the sheet.
- **RFE deadline says "Unknown".** The sheet has no readable PS or CS date for it.

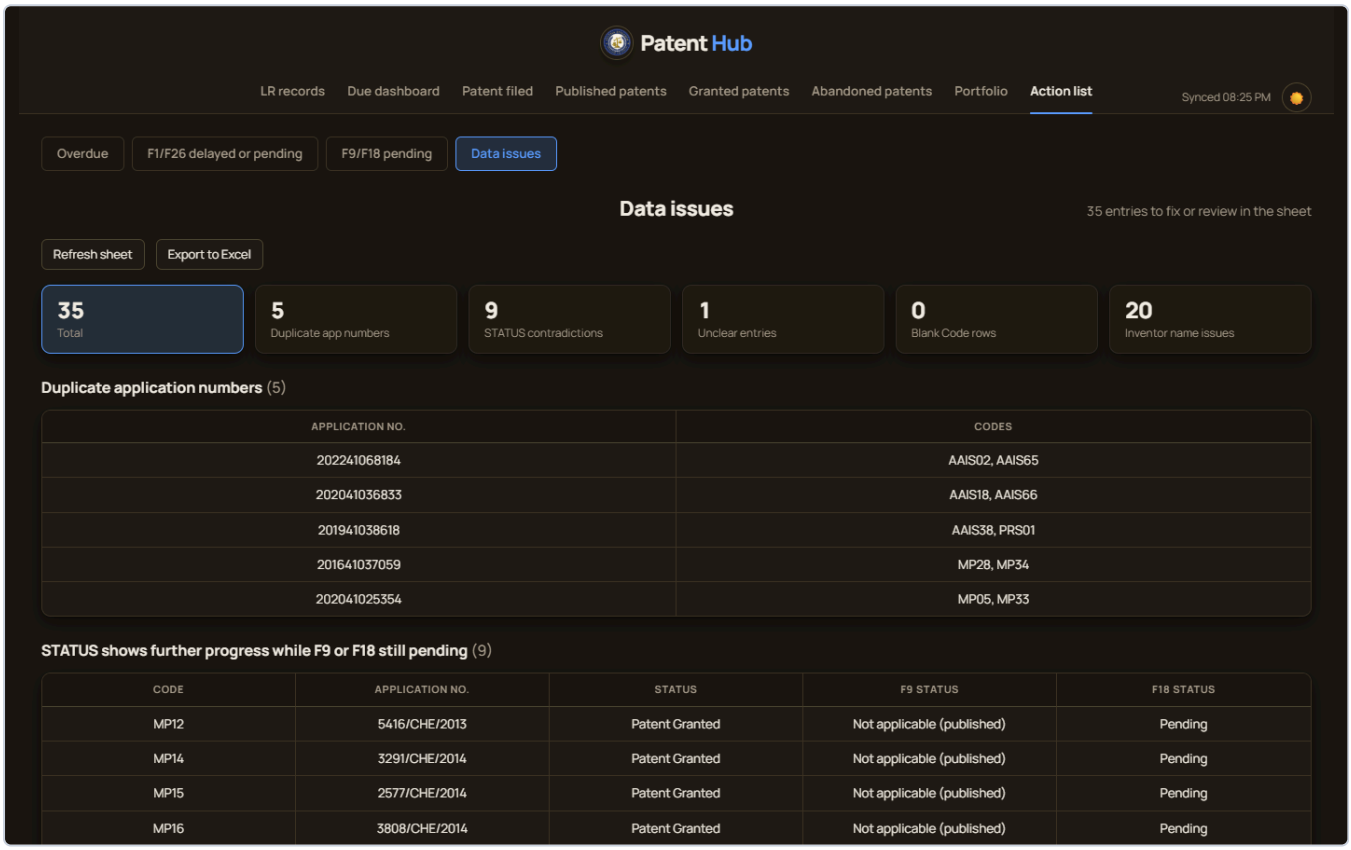

12.4 Data issues

What it is for. A to-do list of sheet entries that need fixing or checking. The app finds them by itself every time it reads the sheet. Fixing the cell in the sheet removes the row at the next refresh.

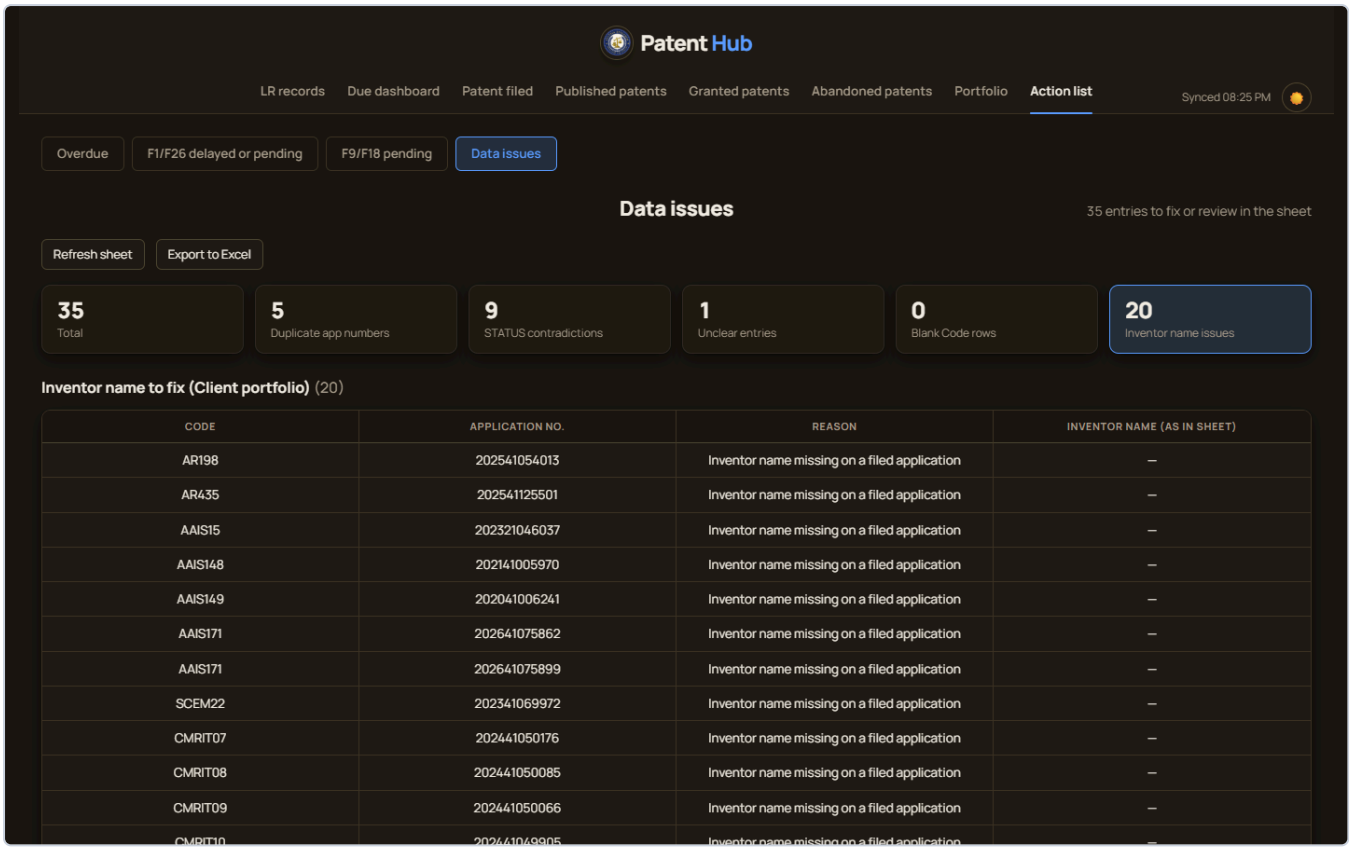

Who uses it and when. Whoever keeps the LR Sheet tidy, ideally once a week.

How to use it

1. Click a card to show only that list, or **Total** to show all of them.
2. Open the LR Sheet and fix each entry.
3. Click **Refresh sheet**. Fixed entries disappear.

Data issues: one card per kind of problem.

Clicking a card shows only that list. Here: Inventor name issues.

The five lists and how to fix them

List	What it means	How to fix it in the sheet
Duplicate app numbers	Two or more codes share one application number.	Correct the wrong application number, or remove the extra row.
STATUS contradictions	STATUS says the application has moved on (FER, WS, Hearing, Grant or Renewal), but Form 9 or Form 18 is still shown as not filed.	Fill in the missing Form 9 / Form 18 date, or correct STATUS.
Unclear entries	A CS, Form 9 or Form 18 cell holds text like "Due date on …" instead of a filing date.	Put the real filing date, or leave it empty if not filed.
Blank Code rows	A row has data but no Code. The table shows the row number in the DATA tab.	Add the Code, or delete the row.
Inventor name issues	The Inventor Name cell is not in the `1. Name` format, or it is blank / "NA" on an application that is already filed.	Write one inventor per line: `1. Name`, `2. Name`, …

Export to Excel includes all five lists, one sheet each.

Common problems

- **I fixed the cell but the row is still here.** Click **Refresh sheet**. If it stays, check the exact format. For example, every inventor line must start with its number and a dot, in order: 1., 2., 3.

13. Common problems and fixes

Problem	What to do
The login screen appears again	You closed the tab, or the app was restarted. Log in again.
"**⚠ Data may be stale**"	The last sheet read failed, or it is old. Click **Refresh sheet**. Point at the warning to see the error. If it stays, tell the app owner.
"**⚠ Backend unreachable**"	Check your internet. If others have the same problem, the server is down. Tell the app owner.
I changed the sheet but the app has not changed	Click **Refresh sheet**, or wait up to 5 minutes.
A list is empty	Clear the search (×), set filters to **All**, and click the first summary card. Check the month and year.
A due or patent is missing	Check that the row has a Code, that the date cell is a real date (DD/MM/YYYY), and that the Code cell is not red (abandoned).
Export to Excel is grey	No rows match your filters.
"**Save failed**" on the Due dashboard	Try again. Check your connection.
I cannot edit on my phone	Editing is desktop only.
An application number did not copy	Some browsers block copying. Select the number and copy it by hand.
The Live Due Board is not in TV layout	Use a taller screen, or click **Full screen**.
An inventor appears under two spellings	Make the spelling the same in the sheet.

14. Glossary

Word	Meaning
LR Sheet	The team's Google Sheet with every application. Patent Hub reads its DATA tab.
Code	The application's own code in the LR Sheet, for example AR477.
Code type	The letters at the start of the code, for example "AR".
MAHE / Non-MAHE / Unclassified	Patent Hub's split of applications by Code type into the MAHE group and the rest. A Code type the app does not know yet shows as "Unclassified".
Application number	The number given to the application when it is filed.
PS	Provisional Specification: the first, provisional filing.
CS	Complete Specification: the full filing.
PS-CS	An application filed first as PS and then as CS. As a due type, it means "the CS is due" (12 months after the PS).
Direct CS	An application filed as CS with no PS before it.
D.O.F.	Date of filing.
Priority date	The date the RFE deadline is counted from: the PS date, or the CS date when there is no PS.
Postdating	Moving the filing date of an application to a later date. Up to 6 months is allowed.
Remaining Post-Date Months	The sheet column that says how much postdating time is left, for example "Not yet Postdated" or "3 months left (92 days)".
Form 1	The application for grant of a patent.
Form 3	The statement and undertaking about filings for the same invention in other countries.
Form 9	Request for early publication.
Form 18 / 18A	Request for examination (RFE) / request for expedited examination.
RFE	Request for examination (Form 18).
Form 26	Authorisation of a patent agent (power of attorney).
FER	First Examination Report: the patent office's first objections. The team files an FER reply.
Hearing	A hearing with the patent office about the objections.
WS	Written Submission, filed after a hearing.
Renewal	The yearly fee to keep a granted patent alive.
Publication	The patent office publishes the application in its journal. It gets a publication number.
Grant	The patent is granted.
Abandoned	The application is no longer pursued. It is marked with a red Code cell in the sheet.
STATUS	The sheet's own text about where the application stands.
Due	One deadline for one application, for example "FORM 1 due on 11/10/2026".
Completed / Pending / Overdue	Filed / not filed and not yet late / not filed and past the deadline.

Word	Meaning
Data issue	A sheet entry the app cannot read or that looks wrong.
Refresh sheet	Makes Patent Hub read the LR Sheet at once.
